A History of the Literature of the U.S. South: Volume 1 Harilaos Stecopoulos, Harry Stecopoulos, 2021-05-20 Drawing on diverse theories and methods this collective volume emphasizes the multi ethnic and transnational aspects of southern literature over a four hundred year period Transformed States Martin Halliwell, 2024-11-15 *Transformed States* offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from *Oryx* and *Crake* to *Annihilation* and from *Gattaca* to *Avatar* By assessing the complex relationship between federal politics and the biomedical industry *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books *Therapeutic Revolutions* 2013 and *Voices of Mental Health* 2017 *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from the combat zones of World War II to

the global emergency of COVID 19 **Surreal Entanglements** Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction. In contrast to universalist and essentializing ways of responding to new material realities, VanderMeer's work invites us to re-imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today: the ecological, technological, aesthetic, epistemological, and political challenges of life in the Anthropocene era. Situating these messy, multi-scalar material complexities of life in close relation to their ecological material and colonialist histories, his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight. The collection measures VanderMeer's work as a new kind of speculative surrealism, his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio-technologies. The first collection to survey academic engagements with VanderMeer, this book brings together scholars in the fields of environmental literature, science fiction, genre studies, American literary history, philosophy of technology, and digital cultures to reflect on the environmentally, culturally, aesthetically, and politically central questions his fiction poses to predominant understandings of the Anthropocene.

Otoritas (Authority) - Lanjutan Pemusnahan (Annihilation) Jeff Vandermeer, 2019-06-17 BUKU 2 TRILOGI SOUTHERN REACH Lanjutan PEMUSNAHAN ANNIHILATION Setelah tiga puluh tahun serangkaian ekspedisi mulai menjelajahi Area X, bentang alam luas yang dikitari perbatasan tak terlihat dan secara misterius menghapus semua tanda peradaban. Ekspedisi ini diawasi oleh suatu badan pemerintah yang sangat rahasia dan nyaris terlupakan. Southern Reach John Rodriguez alias Control ditunjuk untuk mengepalai Southern Reach. Sebagai direktur baru, dia harus bekerja sama dengan tim yang putus asa dan tak dapat diandalkan melakukan serangkaian interogasi, melelahkan, memeriksa tumpukan catatan tersembunyi, dan berjam-jam menonton rekaman video yang meresahkan semuanya demi memecahkan rahasia Area X. Control juga terobsesi pada sang ahli biologi yang kembali dari balik perbatasan tanpa teringat apa pun dan kini ditahan di markas besar Southern Reach untuk diinterogasi. Terbelit dalam dunia paranoia dan rahasia, Control mulai menembus rahasia Area X. Namun dalam setiap penemuan, dia harus menghadapi kebenaran yang meresahkan tentang badan yang dikepalainya dan dirinya sendiri. Mencekam Julie Bosman The New York Times dengan pujian untuk TRILOGI SOUTHERN REACH

The Ends of Knowledge Rachael Scarborough King, Seth Rudy, 2023-06-01 Bringing together an exciting group of knowledge workers, scholars, and activists from across fields, this book revisits a foundational question of the Enlightenment: what is the last or furthest end of knowledge? It is a book about why we do what we do and how we might know when we are done. In the reorganization of knowledge that characterized the Enlightenment, disciplines were conceived as having particular ends, both in terms of purposes and end points. As we experience an ongoing shift to the knowledge economy of the Information Age, this collection asks whether we still conceptualize knowledge in this way. Does an individual discipline have both an inherent purpose and a

natural endpoint What do an experiment on a fruit fly a reading of a poem and the writing of a line of code have in common Focusing on areas as diverse as AI biology Black studies literary studies physics political activism and the concept of disciplinarity itself contributors uncover a life after disciplinarity for subjects that face immediate threats to the structure if not the substance of their contributions These essays whether reflective historical eulogistic or polemical chart a vital and necessary course towards the reorganization of knowledge production as a whole

The Cross, the Plow and the Skyline Ernest J. Yanarella, 2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the Cross the Plow and the Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition s critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF F and literary fiction Ensnared in the cultural social and political zeitgeist of the New Millennium s first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth s social and environmental crises of our times and coming decades

Science Fiction beyond Borders Shawn Edrei, Danielle Gurevitch, 2016-12-14 Since the turn of the previous century science fiction and its native tropes have been used by authors artists filmmakers and critics in order to challenge boundaries whether these be conceptual literary or metaphorical Uniquely inherent to the genre is its ability to explore as a form of thought experiment different ways of crossing and subverting borders previously thought to be inviolable these transgressions and their effects on popular culture have in turn led to an increased presence of science fiction studies in academia This volume features papers presented at the 2014 and 2015 Science Fiction Symposia held at Tel Aviv University These essays submitted by an eclectic mix of scholars from different disciplines institutes and walks of life demonstrate the diversity and adaptability of science fiction as a tool for asking and answering impossible questions

Ruin and Resilience Daniel Spoth, Scott Romine, 2023-04-05 In *Ruin and Resilience* Daniel Spoth confronts why the environmental

stories told about the U S South curve inevitably toward distressing plotlines Examining more than a dozen works of postbellum literature and cinema Spoth s analysis winds from John Muir s walking journey across the war torn South through the troubling of southern environmentalism s modernity by Faulkner and Hurston past the accounts of its acceleration in Welty and O Connor and finally into the present uncovering how the tragic econarrative is transformed by contemporary food studies climate fiction and speculative tales inspired by the region Phrased as a reaction to the rising temperatures and swelling sea levels in the South Ruin and Resilience conceptualizes an environmental ecocritical ethos for the southern United States that takes account of its fundamentally vulnerable status and navigates the space between its reactionary politics and its ecological failures [The Psychology of Global Crises and Crisis Politics](#) Irene Strasser,Martin

Calling this twenty first century environmental imagination *Nature Remade* Carruth describes a distinctly West Coast framework that is at once nostalgic and futuristic Through three case studies synthetic wildlife the digital cloud and space colonization the book shows *Nature Remade* to be a quasi religious belief in venture capitalism and big tech This paradigm thus imagines a future in which species ecosystems and entire planets are re generated and re created through engineering *Novel Ecologies* challenges the conviction that climate change and other environmental crises must be met with ever larger scale forms of technological intervention Against the new worlds conjured by Google Meta Open AI Amazon SpaceX and a host of lesser known start ups Carruth marshals writers and artists who imagine provisionally hopeful environmental futures while refusing to forget the histories that have made the world what it is On this track of the book Carruth discusses the works of Octavia Butler Becky Chambers Jennifer Egan Ruth Ozeki Craig Santos Perez Tracy K Smith Jeff VanderMeer Saya Woolfalk and many more Their novels poems installation artworks and expressive media offer a speculative world built on livable communities rather than engineered lifeforms

entanglement of human communities and nonhuman phenomena How can narrative undermine linearity in order to reject notions of unlimited technological progress and economic growth What does it mean to say that nonhuman materials and processes from contaminated landscapes to natural evolution can become characters in stories And conversely how can narrative trace the rising awareness of climate change in the thick of human characters mental activities These are some of the questions Narrating the Mesh addresses by engaging with contemporary works by Ted Chiang Emily St John Mandel Richard Powers Jeff VanderMeer Jeanette Winterson and many others Entering interdisciplinary debates on narrative and the Anthropocene this book explores how stories can bridge the gap between scientific models of the climate and the human scale world of everyday experience powerfully illustrating the complexity of the ecological crisis at multiple levels
