Development in Wastewater Treatment Research and Processes Maulin P. Shah, Susana Rodriguez-Couto, Ashok Kumar Nadda, Achlesh Daverey, 2022-10-28 Industrial wastewater contains a large variety of compounds such as hazardous organic pollutants heavy metals salts and nutrients which makes its treatment challenging On the other hand the sewage treatment with existing technologies is not cost effective due to high energy demand and contributes to greenhouse gas emission Thus the use of conventional water treatment methods is neither sustainable nor always effective In this sense BESs has emerged as a promising technology to treat complex industrial wastewater with a sustainable manner

Development in Wastewater Treatment Research and Processes Bioelectrochemical Systems for Wastewater Management analyses and discusses the potential of microbial and electrochemical based hybrid processes for the treatment of complex industrial wastewater along with the recovery of valuable compounds and water reutilization The most significant advantages of BES are high effectiveness low toxicity gentle operation conditions environmentally friendly treatment without sludge accumulation and energy conservation Bioelectrochemical systems BES are emerging as an exciting platform to convert chemical energy of organic wastes into electricity or hydrogen or value added chemical commodities In addition recent and future trends in BES are highlighted Discusses the fundamentals of biological wastewater treatment and bio electrochemical systems advantages limitations and promising solutions of different types of energy recovery options from wastewater Presents the recent trends and developments in BES for achieving the sustainable wastewater treatment Covers the applications of BES and BES based hybrid treatment technologies for wastewater treatment Includes carbon capture and resource recovery other than energy from wastewater using BES systems Addresses the challenges in the full scale implementation of BES in existing and new wastewater treatment plants

Electric Vehicle Propulsion Drives and Charging Systems Kundan Kumar,Ambrish Devanshu,Sanjeet K.

Dwivedi,2024-06-18 This book covers the introduction theory development and applications of hybrid and electric vehicles and their charging infrastructures It also discusses the real applications of power converters and electric drives to give the readers a flavour of how to design propulsion drives and fast charging systems for electric vehicles It further covers important topics such as static and dynamic wireless charging systems battery management and battery swapping systems for electric vehicles This book Presents comprehensively different types of electric vehicles and their powertrain architecture Highlights modern optimization techniques such as genetic algorithms simulated annealing particle swarm optimization and ant colony optimization Discusses different charging methods such as wired and wireless for a variety of batteries including lead acid lithium ion and vanadium redox Covers grid to vehicle vehicle to grid and vehicle to vehicle bidirectional power flow analysis Showcases power 2X technologies such as power to ammonia power to chemicals power to fuel power to gas and power to hydrogen The text is primarily written for senior undergraduate and graduate students as well as academic researchers in the fields of electrical engineering electronics and communications engineering Scientific and Technical Aerospace Reports ,1995 Current Consumer Cases ,2010 *International Symposium on Engineering and Business Administration* Khalil Abdelrazek Khalil,Abdul Ghani Olabi,2023-08-30 Selected peer reviewed full text papers from the International Symposium on Engineering and Business Administration ISEBA 2021 Selected peer reviewed full text papers from the International Symposium on Engineering and Business Administration ISEBA 2021 April 10 12 2021 Sharjah UAE **JJAP** ,2009 **New Electric Power Technologies** United States Government Printing Office,États Unis.
