Biology Neil A. Campbell, Jane B. Reece, 2005 Neil Campbell and Jane Reece's *BIOLOGY* remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter; each numbered Concept Head announces the beginning of a new concept, and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter.

Essential Biology Neil A. Campbell, Jane B. Reece, Eric Jeffrey Simon, 2007 *Essential Biology* is a brief non-majors biology book that combines clear writing, real-world applications, vivid art, and powerful media to teach readers the important concepts of biology and give them an appreciation for how biology relates to their everyday lives. To help readers become informed citizens, the new edition features even more human applications and up-to-date information on important issues like DNA technology, cloning, and global warming.

KEY TOPICS The book covers four major biological topics: cells, genetics, evolution, diversity, and ecology, and uses evolution as an overarching theme to tie all 20 chapters together. For college instructors, students, or anyone interested in biology.
