

CHAPTER 2 THEORETICAL FRAMEWORK FOR THE STUDY

What differentiates the writing of research of scholars from that of journalists is a well-developed and articulate theoretical framework (Caliendo & Kyle, 1996). This chapter deals with aspects of theoretical frameworks in general and in particular a theoretical framework for research investigating the pedagogical content knowledge of teachers teaching evolution.

2.1 THE ROLE OF A THEORETICAL FRAMEWORK IN RESEARCH

The term "theoretical framework" comprises two words, "theory" and "framework". It is therefore appropriate to start by giving definitions of what a theory is and what a framework is. A theory, according to Kerlinger (1986:9), is "*a set of interrelated constructs, definitions, and propositions that present a systematic view of phenomena by specifying relations among variables with the purpose of explaining and predicting phenomena*". A framework is "*a set of ideas that you use when you are forming your decisions and judgements*" (MacMillan English dictionary, 2002:561). According to Kerlinger (1986), a theory can be used to successfully make predictions and this predictive power of the theory can help guide researchers to ask appropriate research questions. On the other hand, a framework provides structure within which the relationships between variables of a phenomenon are explained.

Abd-El-Khalick & Akerson (2007) point out the difficulty of identifying an exact definition of a theoretical framework in the field of (science) education. Nevertheless, LeCompte and Preissle (1993) define a theoretical framework as a collection of interrelated concepts that can be used to direct research with the purpose of predicting and explaining the results of the research. Simply put, a theoretical framework is used to provide the rationale for conducting the research (Caliendo & Kyle, 1996; Radhakrishna, Yoder & Ewing, 2007).

In educational research, theoretical frameworks have a number of roles, which improve the quality of research (Caliendo & Kyle, 1996). According to various authors, theoretical frameworks:

- connect the researcher to existing literature (Smyth, 2004; Herek, 1995).
- provide assumptions that guide the research (Miller, 2007).
- help the researcher to choose appropriate questions for the study (Miller, 2007).
- convince the reader of the relevance of the research question (LeCompte & Preissle, 1993; Mishra & Koehler, 2006).
- guide the choice of research design (LeCompte & Preissle, 1993).
- guide the researcher toward appropriate data collection methods (Miller, 2007).

Levine, 2011 Code Choice in the Language Classroom argues that the foreign language classroom is and should be regarded as a multilingual community of practice rather than as a perpetually deficient imitator of an exclusive second language environment From a sociocultural and ecological perspective Levine guides the reader through a theoretical empirical and pedagogical treatment of the important roles of the first language and of code switching practices in the language classroom Intended for SLA researchers language teachers language program directors and graduate students of foreign languages and literatures the book develops a framework for thinking about all aspects of code choice in the language classroom and offers concrete proposals for designing and carrying out instruction in a multilingual classroom community of practice An extremely timely book on one of the most vexing issues in foreign language teaching how much codeswitching is acceptable or even desirable in the 21st century 12 classroom Through a sound theoretical framework and concrete pedagogical examples Glenn Levine develops an exciting innovative multilingual approach to curriculum design teaching and articulation that engages the students in the co construction of code choice conventions Claire Kramsch University of California at Berkeley USA
