Tchaikovsky, 2022-05-03 The Arthur C Clarke award winning author of Children of Time brings us the second novel in an extraordinary space opera trilogy about humanity on the brink of extinction and how one man's discovery will save or destroy us all After eighty years of fragile peace the Architects are back wreaking havoc as they consume entire planets In the past Originator artefacts vestiges of a long vanished civilization could save a world from annihilation This time the Architects have discovered a way to circumvent these protective relics Suddenly no planet is safe Facing impending extinction the Human Colonies are in turmoil While some believe a unified front is the only way to stop the Architects others insist humanity should fight alone And there are those who would seek to benefit from the fractured politics of war even as the Architects loom ever closer Idris who has spent decades running from the horrors of his past finds himself thrust back onto the battlefield As an Intermediary he could be one of the few to turn the tide of war With a handful of allies he searches for a weapon that could push back the Architects and save the galaxy But to do so he must return to the nightmarish unspace where his mind was broken and remade What Idris discovers there will change everything Alter(ed) Bodies Mateusz Borowski, Małgorzata

Sugiera, 2025-07-14 The fundamental assumption behind the volume is that the current civilizational crisis manifested in such phenomena as climate change environmental catastrophes pandemics and wars puts into question the biopolitical means of optimizing the life of populations and individuals To narrow down the thematic concerns of the volume the chapters are centered around the notion of body fundamental for the majority of theoretical takes on biopolitics The volume shows that in the current age of catastrophes bodies are not only shaped and individualized through procedures of institutionalized discipline but by an entanglement of environmental and planetary factors typically omitted in extant accounts of biopolitics The chapters go beyond biopolitics because they show bodies as sites of operation of non human or more than human agencies that work on scales inaccessible to human sensorium **Walking to Aldebaran** Adrian Tchaikovsky, 2019-05-28 I
