Environmental Engineering G. Lindner, K. Nyberg, 2012-12-06 Chemistry and its products today play an important role in almost all industrial activities Chemistry has captured our homes We are supplied with new articles in an ever increasing stream New uses are being discovered Old products disappear Continuing and fast expansion is expected for the chemical industry in its proper sense The reason for this is of course that chemistry has created products which meet requirements that we consider urgent or which in different ways make work easier and make us more efficient thereby increasing our standard of living in a wide sense in terms of money more spare time social security better education and better public health services But a high standard of living also implies a good living environment A lot of what has been done in praiseworthy aspiration of a better means of support and an improved standard of living has involved a wasting of non renewable natural resources The products themselves or their waste products may pose a threat to the objectives we are trying to attain

A Textbook of Environmental Chemistry V. Subramanian, 2011-08-24 This book addresses key topics related to the broad subject of Environmental Chemistry The book tries to present the topics that are essential to understand the chemical process in our environment involving air water and soil Chapters that are very much current such as environmental nuclear chemistry analytical tools needed for chemical aspect of our environment solid waste and management methodology quality criteria for air and water have all been treated in a simple fashion so that a reader can refer to advanced books in specific topics for better understanding A brief review of fundamentals of chemistry is also included References are listed that are easily available in the subcontinent and also many commonly accessed websites are also mentioned for better and detailed information on specific topics or sub topics The book follows the syllabus for Environmental Chemistry by UGC for M Sc as well as by AICTE for M Tech B Tech students in environmental engineering The contents can be covered either in one semester course or in an annual mode with spread out teaching Topics mentioned in this book can also form independent modules
