The Ethics of Total Confinement Bruce A. Arrigo, Heather Y. Bersot, Brian G. Sellers, 2011-06-29 In three parts this volume in the AP LS series explores the phenomena of captivity and risk management guided and informed by the theory method and policy of psychological jurisprudence The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent conditions of control These conditions impose barriers to justice and set limits on citizenship for one and all Situated at the nexus of political social theory mental health law and jurisprudential ethics the book examines and critiques constructs such as offenders and victims self and society therapeutic and restorative health harm and community So too are

three total confinement case law data sets on which this analysis is based The volume stands alone in its efforts to systematically diagnose the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting 1 the rights of juveniles found competent to stand criminal trial the mentally ill placed in long term disciplinary isolation and sex offenders subjected to civil detention and community re entry monitoring 2 the often unmet needs of victims and 3 the demands of an ordered society Carefully balancing sophisticated insights with concrete and cutting edge applications the book concludes with a series of provocative yet practical recommendations for future research and meaningful reform within institutional practice programming and policy The Ethics of Total Confinement is a thought provoking and timely must read for anyone interested in the ethical and legal issues regarding madness citizenship and social justice It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us Instead the path forward must run through a return to the ethical and psychological roots of security and justice The Ethics of Total Confinement is a quantum step forward in defining and advancing that path Jonathan Simon Adrian A Kragen Professor of Law Jurisprudence and Social Policy Program UC Berkeley School of Law This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness It focuses on three outcast groups juveniles tried as adults people with mental illness subjected to hospitalization and sex offenders committed as dangerous and based on an innovative analysis of the relevant caselaw and empirics shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest most uninformed fears Relying on Aristotelian philosophy therapeutic and restorative principles and commonsense justice the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing Christopher Slobogin Milton Underwood Professor of Law Vanderbilt University Law School The Ethics of Total Confinement A Critique of Madness Citizenship and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines By bridging gaps among relevant disciplines the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological ethical or justice based standards The book s provocative conclusions and recommendations offer much food for thought and suggest potential directions for action Dennis Fox Emeritus Associate Professor of Legal Studies and Psychology University of Illinois at Springfield The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept It is a book that synthesises in creative new ways reformist visions of justice virtue and the cultivation of habits of character This is profound work that opens new paths to dignity healing and social justice John Braithwaite Australian Research Council Federation Fellow Australian National University The Ethics of Total Confinement offers a useful and wide ranging perspective grounded in psychological jurisprudence With its emphasis on the harm done to those most vulnerable to

extremes of risk management this volume makes a welcome addition to the literature on confinement Lorna Rhodes Professor Department of Anthropology University of Washington The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices aspiring to greater justice and human flourishing for all A timely intervention of this kind is most welcome George Pavlich Associate Vice President Research Professor of Law and Sociology University of Alberta

Psychosis, Psychiatry and Psychospiritual Considerations Brian Spittles, 2022-11-29 A phenomenological and spiritual investigation of anomalous mental experiences From a psychiatric perspective psychosis is generally viewed as a psychopathological and often incomprehensible mental disorder of biological cause In his book Brian Spittles argues that this represents a rather limited view and that a psychospiritual investigation of psychosis may enable a better understanding of its nature and determinants His aim is not to negate the discipline of psychiatry but to demonstrate the viability and efficacy of incorporating psychospiritual considerations into psychosis research Within these pages Spittles challenges several core psychiatric beliefs and calls for the discipline to extend its investigative parameters beyond the limited epistemological bounds of materialism The book uses an open ended heuristic approach that enables the systematic examination and critical appraisal of views on psychosis across the materialist to metaphysical spectrum This is structured in four Focal Settings that sequentially examine the construal of psychosis within different paradigms of psychospiritual understanding which provide a historical overview of evolving understandings of psychosis within the tradition of psychiatry in which psychospiritual matters are generally not considered
