Mars Worlds without End is an expertly guided tour of this thrilling frontier in astronomy the search for planets with the potential to host life With the approachable style that has made him a leading interpreter of astronomy and space science Chris Impey conducts readers across the vast fast developing field of astrobiology surveying the dizzying advances carrying us ever closer to the discovery of life beyond Earth and the prospect of humans living on another planet Since the first exoplanet or planet beyond our solar system was discovered in 1995 over 4 000 more have been pinpointed including hundreds of Earth like planets many of them habitable detected by the Kepler satellite With a view spanning astronomy planetary science geology chemistry and biology Impey provides a state of the art account of what s behind this accelerating progress what s next and what it might mean for humanity s future The existential threats that we face here on Earth lend urgency to this search raising the question Could space be our salvation From the definition of habitability to the changing shape of space exploration as it expands beyond the interests of government to the pursuits of private industry Worlds without End shows us the science on horizons near and far that may hold the answers
