Signal ,2001 *Designing Cost Management Systems to Support Business Decision-Making* Pieter Buys,2021-07-19 This book illustrates the importance effective cost management systems in providing a supportive environment in which

reliable and relevant management information can be generated. Such a cost management system is only attainable if the importance of key business operational and stakeholder requirements are recognised within the organisational context. In illustrating this importance, this book provides several case studies as examples thereof. The first two case studies focus on the engineering sector and illustrate the development of a cost management system in a water recycling context and the design of a budgetary system in a mining engineering context. The remaining case studies focus on the services sector, including cost management systems for a digital technology services provider and a medical insurance services provider, an alternative activity-based costing approach for a public sector services provider, and finally a re-designed value stream for an automotive services provider. Academic researchers and industry managers in the fields of management accounting and financial management, as well as engineering and operations management, will find value in the experiences described herein.

Management in Public Administration Konrad Raczkowski, 2016-11-09
This book draws on financial, economic, and management theory in its exploration of the theory underlying risk and risk management at both micro and macroeconomic levels. It has a particular reference to the public financial sector. Chapters investigate the elimination of currency risk in the Transatlantic Trade and Investment Partnership (TTIP) as well as the changes that credit ratings undergo due to the influence of credit spreads. Featuring contributions on important topics such as public safety and the internet, intellectual capital, bank regulatory risk in the EU, the financial distress of public sector entities, and systemic risk in the insurance sector, it also explores innovative and emerging issues in the European tax gap in personal income taxes and VAT carousel fraud in selected European countries. Discussion of the complex nature of risk management in public administration will appeal to public officials, policy makers, academics, and researchers alike. **The Carbon Farming Solution** Eric Toensmeier, 2016

Agriculture is rightly blamed as a major culprit of our climate crisis. But in this groundbreaking new book, Eric Toensmeier argues that agriculture, specifically the subset of practices known as carbon farming, can and should be a linchpin of a global climate solutions platform.
