Wang,1984-08-31 To understand what we know and be aware of what is to be known has become the central focus in the treatment of CAD CAM issues It has been some time since we began treating issues arriving from engineering data handling in a low key fashion because of its housekeeping chores and data maintenance aspects representing nonglamorous issues related to automation Since the advent of CAD CAM large numbers of data bases have been generated through standalone CAD systems And the rate of this automated means of generating data is rapidly increasing this is possibly the key factor in changing our way of looking at engineering data related problems As one deeply involved with engineering data handling and CAD CAM applications I know that to succeed we must do our homework tracking the trends keeping abreast of new technologies new applications new companies and products that are exploding on the scene every day In today's fast paced information handling era just keeping up is a full time job That is why

Medland,Piers Burnett,1986-06-30 Little more than a decade ago computer aided design and manufacture CAD CAM was a very esoteric field indeed not one that was of much practical concern to a manager or industrialist unless his business was on the scale of say a major automobile manufacturer or in a field of high technology such as aerospace Like so much else this situation was revolutionized by the invention of the silicon chip the arrival of the micro processor and the dramatic fall in the cost of computer hardware Today CAD CAM has spread down the market and down the price scale to the point at which it is both a feasible and an affordable technology for a wide range of small and medium sized companies in areas as various as architecture and general engineering plastic moulding and consumer electronics But the explosion there is no other word for it in the variety and capabilities of CAD CAM systems and their spectacular climb to the top of the hi tech hit parade has placed the potential purchaser and user of the new technology in a difficult position On the one hand he is assured not least by the manufacturers of CAD CAM equipment that a failure to invest in it will leave his company stranded in the industrial Stone Age CAD/CAM IBRAHIM ZEID,1995-06-01
