Handbook of pulp and paper technology, ed by k.w. britt ,1964 Biermann's Handbook of Pulp and Paper
Pratima Bajpai, 2018-05-17 Biermann's Handbook of Pulp and Paper Raw Material and Pulp Making Third Edition is a comprehensive reference for industry and academia covering the entire gamut of pulping technology This book provides a thorough introduction to the entire technology of pulp manufacture features chapters covering all aspects of pulping from wood handling at the mill site through pulping and bleaching and pulp drying It also includes a discussion on bleaching chemicals recovery of pulping spent liquors and regeneration of chemicals used and the manufacture of side products The secondary fiber recovery and utilization and current advances like organosolv pulping and attempts to close the cycle in bleaching plants are also included Hundreds of illustrations charts and tables help the reader grasp the concepts being presented This book will provide professionals in the field with the most up to date and comprehensive information on the state of the art techniques and aspects involved in pulp making It has been updated revised and extended Alongside the traditional aspects of pulping and papermaking processes this book also focuses on biotechnological methods which is the distinguishing feature of this book It includes wood based products and chemicals production of dissolving pulp hexenuronic acid removal alternative chemical recovery processes forest products biorefinery The most significant changes in the areas of raw material preparation and handling pulping and recycled fiber have been included A total of 11 new chapters have been added This handbook is essential reading for all chemists and engineers in the paper and pulp industry Provides comprehensive coverage on all aspects of pulp making Covers the latest science and technology in pulp making Includes traditional and biotechnological methods a unique feature of this book Presents the environmental impact of pulp and papermaking industries Sets itself apart as a valuable reference that every pulp and papermaker engineer chemist will find extremely useful **A Handbook of Papermaking** Robert R. A. Higham, 1968 *Handbook of Pulping and Papermaking* Christopher J. Biermann, 1996-08-01 In its Second Edition Handbook of Pulping and Papermaking is a comprehensive reference for industry and academia The book offers a concise yet thorough introduction to the process of papermaking from the production of wood chips to the final testing and use of the paper product The author has updated the extensive bibliography providing the reader with easy access to the pulp and paper literature The book emphasizes principles and concepts behind papermaking detailing both the physical and chemical processes A comprehensive introduction to the physical and chemical processes in pulping and papermaking Contains an extensive annotated bibliography Includes 12 pages of color plates **Biermann's Handbook of Pulp and Paper** Pratima Bajpai, 2018-05-17 Biermann's Handbook of

Pulp and Paper Paper and Board Making Third Edition provides a thorough introduction to paper and board making providing paper technologists recent information The book emphasizes principles and concepts behind papermaking detailing both the physical and chemical processes It has been updated revised and extended Several new chapters have been added Papermaking chemistry has found an adequate scope covering this important area by basics and practical application Scientific and technical advances in refining including the latest developments have been presented The process of stock preparation describes the unit processes An exhaustive overview of Chemical additives in Pulp and Paper Industry is included Paper and pulp processing and additive chemicals are an integral part of the total papermaking process from pulp slurry through sheet formation to effluent disposal Water circuits with loop designs and circuit closure are presented The chapter on paper and board manufacture covers the different sections in the paper machine and also fabrics rolls and roll covers and describes the different types of machines producing the various paper and board grades Coating is dealt with in a separate chapter covering color formulation and preparation and also coating application Paper finishing gives an insight into what happens at roll slitting and handling The chapter on environmental impact includes waste water treatment and handling air emissions utilization and solid residue generation and mitigation The major paper and board grades and their properties are described Biotechnological methods for paper processing are also presented This handbook is essential reading for Applied Chemists Foresters Chemical Engineers Wood Scientists and Pulp and Paper technologist Engineers and anyone else interested or involved in the pulp and paper industry Provides comprehensive coverage on all aspects of papermaking Covers the latest science and technology in papermaking Includes traditional and biotechnological methods a unique feature of this book Presents the environmental impact of papermaking industries Sets itself apart as a valuable reference that every pulp and papermaker engineer chemist will find extremely useful

Springer Handbook of Wood Science and Technology Peter Niemz,Alfred Teischinger,Dick Sandberg,2023-04-01

This handbook provides an overview on wood science and technology of unparalleled comprehensiveness and international validity It describes the fundamental wood biology chemistry and physics as well as structure property relations of wood and wood based materials The different aspects and steps of wood processing are presented in detail from both a fundamental technological perspective and their realisation in industrial contexts The discussed industrial processes extend beyond sawmilling and the manufacturing of adhesively bonded wood products to the processing of the various wood based materials including pulp and paper natural fibre materials and aspects of bio refinery Core concepts of wood applications quality and life cycle assessment of this important natural resource are presented The book concludes with a useful compilation of fundamental material parameters and data as well as a glossary of terms in accordance with the most important industry

standards Written and edited by a truly international team of experts from academia research institutes and industry thoroughly reviewed by external colleagues this handbook is well attuned to educational demands as well as providing a summary of state of the art research trends and industrial requirements It is an invaluable resource for all professionals in research and development and engineers in practise in the field of wood science and technology Handbook of Paper and Board Herbert Holik,2013-03-25 Papermaking is a fascinating art and technology The second edition of this successful 2 volume handbook provides a comprehensive view on the technical economic ecologic and social background of paper and board It has been updated revised and largely extended in depth and width including the further use of paper and board in converting and printing A wide knowledge basis is a prerequisite in evaluating and optimizing the whole process chain to ensure efficient paper and board production The same is true in their application and end use The book covers a wide range of topics Raw materials required for paper and board manufacturing such as fibers chemical additives and fillers Processes and machinery applied to prepare the stock and to produce the various paper and board grades including automation and trouble shooting Paper converting and printing processes book preservation The different paper and board grades as well as testing and analysing fiber suspensions paper and board products and converted or printed matters Environmental and energy factors as well as safety aspects The handbook will provide professionals in the field e g papermakers as well as converters and printers laymen students politicians and other interested people with the most up to date and comprehensive information on the state of the art techniques and aspects involved in paper making converting and printing Handbook of Industrial Chemistry and Biotechnology James A. Kent,Tilak V. Bommaraju,Scott D. Barnicki,2017-08-01 This widely respected and frequently consulted reference work provides a wealth of information and guidance on industrial chemistry and biotechnology Industries covered span the spectrum from salt and soda ash to advanced dyes chemistry the nuclear industry the rapidly evolving biotechnology industry and most recently electrochemical energy storage devices and fuel cell science and technology Other topics of surpassing interest to the world at large are covered in chapters on fertilizers and food production pesticide manufacture and use and the principles of sustainable chemical practice referred to as green chemistry Finally considerable space and attention in the Handbook are devoted to the subjects of safety and emergency preparedness It is worth noting that virtually all of the chapters are written by individuals who are embedded in the industries whereof they write so knowledgeably Paper Machine Clothing Sabit Adanur,2017-11-01 Everyone involved in paper making knows Asten as a world class manufacturer of paper machine clothing Perhaps less well known is that Asten started in this industry more than 120 years ago Since then the company has taken advantage of modern manufacturing techniques to produce innovative products needed by the growing paper making industry That is why Asten commissioned Dr Sabit Adanur to write this book to continue spreading sophisticated papermaking knowledge throughout the global paper industry This book discusses how the latest technological innovations help produce quality paper products It also covers the

use of TQM and computers in the papermaking process as basic paper structure and properties

Pulp and Paper Industry Pratima Bajpai, 2015-04-09 Pulp and Paper Industry Chemicals features in depth and thorough coverage of Chemical additives in the Pulp and Paper Industry It discusses use of Enzymes Green Chemicals that can improve operations in pulp and paper describes Chemicals demanded by the end user and many key and niche players such as Akzo Nobel NV Eka Chemicals AB Ashland Inc BASF Buckman Laboratories International Inc Clariant Cytec Industries Inc Enzymatic Deinking Technologies LLC ERCO Worldwide FMC Corporation Georgia Pacific Corporation Georgia Pacific Chemicals LLC Imerys SA Momentive Specialty Chemicals Inc Novozymes Kemira Chemicals Nalco Holding Company Omya AG Solvay AG and Solvay Chemicals Inc Paper and pulp processing and additive chemicals are an integral part of the total papermaking process from pulp slurry through sheet formation to effluent disposal Environmental concerns increased use of recycled waste paper as a replacement for virgin pulp changes in bleaching and pulping processes increased efficiency requirements for the papermaking process limits on effluent discharge as well as international competitiveness have greatly impacted the paper and pulp chemical additive market This book features in depth and thorough coverage of Chemical additives in Pulp and Paper Industry Detailed and up to date coverage of Chemicals in Pulp and Paper Industry Authoritative thorough and comprehensive content on a wide variety of Enzymes Green Chemicals Comprehensive list of Paper and Pulp Related Chemicals Comprehensive list of all Pulp and paper Suppliers Comprehensive Indexing Environmentally Friendly Production of Pulp and Paper Pratima Bajpai, 2011-03-21 Implementing Cleaner Production in the pulp and paper industry The large and still growing pulp and paper industry is a capital and resource intensive industry that contributes to many environmental problems including global warming human toxicity ecotoxicity photochemical oxidation acidification nitrification and solid wastes This important reference for professionals in the pulp and paper industry details how to improve manufacturing processes that not only cut down on the emission of pollutants but also increase productivity and decrease costs Environmentally Friendly Production of Pulp and Paper guides professionals in the pulp and paper industry to implement the internationally recognized process of Cleaner Production CP It provides updated information on CP measures in Raw material storage and preparation Pulping processes Kraft Sulphite and Mechanical Bleaching recovery and papermaking Emission treatment and recycled fiber processing In addition the book includes a discussion on recent cleaner technologies and their implementation status and benefits in the pulp and paper industry Covering every aspect of pulping and papermaking essential to the subject of reducing pollution this is a must have for paper and bioprocess engineers environmental engineers and corporations in the forest products industry *Green Pulp and Paper Industry* Amit Kumar, Puneet Pathak, Dharm Dutt, 2021-07-19 This book provides recent developments and future perspectives of pulp and paper processing based on biotechnology to replace conventional environmental unfriendly chemical processes The use of microorganism and microbial enzymes in various processes such as bleaching deinking refining dissolving pulp debarking
