Revised and updated to reflect the latest research and advances available Food Biotechnology Second Edition demonstrates the effect that biotechnology has on food production and processing It is an authoritative and exhaustive compilation that discusses the bioconversion of raw food materials to processed products the improvement of food

Advances in Food Diagnostics Leo M. L. Nollet, Fidel Toldrá, Y. H. Hui, 2008-02-28 Food diagnostics is a relatively new and emerging area fuelled in large part by the ever increasing demand for food safety Advances in Food Diagnostics provides the most updated comprehensive professional reference source available covering sophisticated diagnostic technology for the food industry Editors Nollet Toldrá and Hui and their broad team of international contributors address the most recent advances in food diagnostics through multiple approaches reviewing novel technologies to evaluate fresh products describing and analyzing in depth several specific modern diagnostics providing an analysis of data processing and discussing global marketing with an insight into future trends While covering conventional typically lab based methods of analysis the book focuses on leading edge technologies that are being or about to be introduced The book looks at areas such as food quality assurance safety and traceability Issues such as improved quality control monitoring pesticide and herbicide residues in food determining the nutritional content of food and distinguishing between GM and conventional foodstuffs are covered Advances in Food Diagnostics offers the food professional what its title promises the latest advances in food diagnostics and analysis

Lawrie's Meat Science Fidel Toldrá, 2017-04-29 Lawrie's Meat Science Eighth Edition provides a timely and thorough update to this key reference work documenting significant advances in the meat industry including storage and preservation of meat the eating quality of meat and meat safety The book examines the growth and development of meat animals from the conversion of muscle to meat and eventual point of consumption This updated volume has been expanded to include chapters examining such areas as packaging and storage meat tenderness and meat safety Furthermore central issues such as the effects of meat on health and the nutritional value of meat are analyzed Broadly split into four sections the book opens with the fundamentals behind the growth of meat animals The second section covers the storage and spoilage of meat products with the third section exploring the eating quality of meat from flavor to color The final section reviews meat safety authenticity and the effect of meat on health Encompasses the recognized gold standard reference for the meat industry Brings together leading experts in each area providing a complete overview of the meat sciences Includes all the latest advances bringing this new edition completely up to date including developments in meat quality safety and storage

Advanced Technologies for Meat Processing Fidel Toldrá, Leo M. L. Nollet, 2017-10-10 As with the first edition the main goal of Advanced Technologies for Meat Processing is to provide the reader with recent developments in new advanced technologies for the full meat processing chain This book is written by distinguished international contributors with recognized expertise and excellent reputations and brings together all the advances in a wide and varied number of technologies that are applied in different stages of meat processing This second edition contains 21 chapters combining

updated and revised versions of several chapters with entirely new chapters that deal with new online monitoring techniques like hyperspectral imaging and Raman spectroscopy the use of nanotechnology for sensor devices or new packaging materials and the application of omics technologies like nutrigenomics and proteomics for meat quality and nutrition The book starts with the control and traceability of genetically modified farm animals followed by four chapters reporting the use of online non destructive monitoring techniques like hyperspectral imaging and Raman spectroscopy real time PCR for pathogens detection and nanotechnology based sensors Then five chapters describe different advanced technologies for meat decontamination such as irradiation hydrostatic and hydrodynamic pressure processing other non thermal technologies and the reduction in contaminants generation Nutrigenomics in animal nutrition and production is the object of a chapter that is followed by five chapters dealing with nutritional related issues like bioactive peptides functional meats fat and salt reduction processing of nitrite free products and the use of proteomics for the improved processing of dry cured meats The last four chapters are reporting the latest developments in bacteriocins against meat borne pathogens the functionality of bacterial starters modified atmosphere packaging and the use of new nanotechnology based materials for intelligent and edible packaging
