Harry Potter And Issues In International Politics:

Harry Potter and International Relations Daniel H. Nexon, Iver B. Neumann, 2006-05-25 Drawing on a range of historical and sociological sources this work shows how aspects of Harry's world contain aspects of our own. It also includes chapters on the political economy of the franchise and on the problems of studying popular culture. **The Politics and**

International Relations of Fantasy Films and Television Joel R. Campbell, 2023-02-09 This book uses several fantasy movies or movie series and television series to explain political and international relations IR concepts and theories. It begins with an overview of the importance of fantasy in literature, film and television and its increasing impact on the field of International Relations. It then presents the political IR and social issues in each franchise and in five chapters uses these tales' key story arcs or plot points to illustrate major political and IR themes. The volume pays particular attention to such fantasy franchises as Lord of the Rings, Game of Thrones, the Harry Potter films, recent fairytale and children's stories and female-led fantasy projects. Contemporary Issues in Politics & International Relations Nesrin Kenar, 2021-12-26 Conflict is

a phenomenon as old as human history. Although the actors and reasons have changed, conflicts have occurred in every period of history. In the pre-Cold War era, conflicts in the international system were experienced between states. The conflicts during the Cold War mainly were interstate conflicts arising from the rivalry between the two blocs. In this period, it was expected that the threat to the security of a state would come from outside the borders of the state and from other states. For this reason, all the regulations made by the League of Nations, which was established at the end of the First World War, and the United Nations, which was established after the Second World War to protect international peace and security, included the measures to be taken against the attack or threat of attack by one state against another state. However, the developments that took place right after the end of the Cold War confirmed that the risk of interstate conflict decreased and new security threats emerged in this period. The conflicts that emerged in the post-Cold War period were separatist conflicts due to ethnic and religious reasons, such as the former Yugoslavia and Georgia, or intra-border conflicts that occurred for other reasons, such as in Syria. Upon the inadequacy of international organizations and international law to intervene in intra-border conflicts, the concept of security was redefined and a transformation from the security of the state to the security of the individual took place. New security threats, such as environmental security, human security, food security, terrorism, weapons of mass destruction and pandemics, have been identified. One of the reasons for the decrease in conflicts between states in the post-Cold War period is that states mostly use soft power instead of military force in achieving their foreign policy goals. The structure of the international system is also a dynamic that affects conflicts. After the end of the bipolar system, the transformation of the international system is not yet complete. One of the most critical problems in today's world is the competition and struggle between states to become the future superpower. While the US wants the current status quo to continue, China is trying to change the status quo in its favour. The European Union is to become the dominant power in the

international system after its transformation in the post Cold War period **International Relations Theory** Oliver Daddow, 2013-03-22 International Relations Theory The Essentials provides a complete and concise introduction to the study of international relations theory covering the main theories that you ll encounter on your course In addition its helpful study skills section shows you how to apply your knowledge to coursework and examinations ensuring that you get the most out of your studies This revised second edition includes Coverage of the key theories in international relations including new sections on Democratic Peace Theory Pluralism and Solidarism and Norms An updated study skills section giving you guidance on responding to feedback and avoiding plagiarism along with hints and tips for good essay writing how to get the most out of lectures and seminars and exam preparation A number of useful learning features from questions to ponder and common pitfalls to lists of further reading and taking it further boxes which suggest ways in which you can extend your thinking beyond the classroom Written in a clear and accessible style International Relations Theory The Essentials is the perfect primer for both undergraduate and graduate students new to the topic of international relations theory or for those simply looking for a refresher **The Poetics of International Politics** Milan Babík, 2018-10-26 A cutting edge contribution to the aesthetic turn in international relations scholarship this book exposes the role of poetic techniques in constituting the reality of international politics It has two symmetrical goals to illuminate the nonempirical fictions of factual international relations literature and to highlight the real factual inspirations and implications of contemporary international relations fiction Employing narrative theory developed by Hayden White the author examines factual and fictional accounts of world affairs ranging from the anarchy narrative central to mainstream international relations research to novels by Don DeLillo and Milan Kundera Chapters analyzing factual literature flesh out its unacknowledged inventions while those dedicated to fiction explain its political roots and agenda Throughout the distinction between factual and fictional representations of international relations breaks down Social scientific narratives emerge as exercises in rhetoric the art and politics of persuasion through language Artistic narratives surface as real pedagogical lessons and exercises in political activism The volume challenges the autonomy of academic international relations as an exclusive purveyor of serious knowledge about world affairs and calls for active engagement with literary art It will be of interest to scholars of International Relations Political Theory Historiography Cultural Theory and Literary Studies and Criticism **Harry Potter and International Relations** Daniel H. Nexon, Iver B. Neumann, 2006-05-25 Why not take seriously the claim that Harry Potter s world intertwines with our own In this timely yet otherworldly volume more than a dozen scholars of international relations join hands to demonstrate how this well loved artifact of popular culture reflects and shapes our own lifeworld A wide range of historical and sociological sources shows how Harry s world contains aspects of our own Practices such as quidditch dovetail quite clearly with muggle sports and the very British ness of the books has in translation into languages such as Turkish and Arabic been transformed to reflect these unique cultures Chapters on the political economy of the

franchise as well as the scholarly problems of studying popular culture frame what is essentially a highly informative read

Narrative Traditions in International Politics Johanna Vuorelma, 2021-12-10 This book introduces the concept of narrative tradition to study representation in international politics Focusing specifically on the case of Turkey the book shows how narrative traditions are constructed maintained and passed on by a loose epistemic community that involves practitioners and experts including scholars journalists diplomats and political representatives Employing an interpretative approach the book distinguishes between four narrative traditions in the study of Turkey Turkey as a state that is 1 getting lost 2 standing at a decisive crossroad 3 led by strongmen and 4 struggling with a creeping Islamisation These narrative traditions carry enduring beliefs that not only describe moralise judge and stigmatise Turkey but also contribute to the idea of the West The book focuses on knowledge that is produced from a Western perspective showing that Turkey provides a channel through which the Western self can be debated challenged celebrated and judged Otherworldly Politics Stephen Benedict

Dyson, 2015-06-30 A compelling look at the analogous political worlds of science fiction fantasy and international relations In *Otherworldly Politics* Stephen Benedict Dyson examines the fictional but deeply political realities of three television shows Star Trek Game of Thrones and Battlestar Galactica Dyson explains how these shows offer alternative histories and future possibilities for humanity Fascinated by politics and history science fiction and fantasy screenwriters and showrunners suffuse their scripts with real world ideas of empire war civilization and culture lending episodes a compelling intricacy and contemporary resonance Dyson argues that science fiction and fantasy television creators share a fundamental kinship with great minds in international relations Screenwriters like Gene Roddenberry George R R Martin and Ronald D Moore are world builders of no lesser creativity Dyson argues than theorists such as Woodrow Wilson Kenneth Waltz and Alexander Wendt Each of these thinkers imagines a realm specifies the rules of its operation and by so doing shows us something about ourselves and how we interact with one another Combining intellectual and real world history with lucid theoretical analysis the book is a vital challenge to scholars and a spur to creative thinking for fans of these three influential shows

Battlestar Galactica and International Relations Nicholas Kiersey, Iver Neumann, 2013-02-15 Looking at a television franchise like Battlestar Galactica BSG is no longer news within the discipline of International Relations A growing number of scholars in and out of IR are studying the importance of cultural artifacts popular or otherwise for the phenomena that make up the core of our discipline The genre of science fiction offers the analyst an opportunity that cannot be matched by more mimetic genres namely the chance to look at how sets of widely circulating expectations of the social serve to constrain authors as they work to introduce as yet unexplored problematiques the fantasy aspect in much of science fiction storytelling is premised simply on a material difference As such while the physical setting of a science fiction tale might appear novel its imaginative life world will likely retain many elements of the world we already live in and which we can readily recognize as similar to our own For Critical IR scholarship then BSG presents an opportunity to examine how these purported homologies

or elements of redundancy between the fantastic and the real have been drawn and perhaps to consider too whether the show can teach us things about world politics its various logics and structures which we might not otherwise be sensitive to Tackling some of the key contemporary issues in IR the writers of BSG have taken on a range of important political themes and issues including the legitimacy of military government the tactical utility of genocide and even the philosophical implications of artificial intelligence technologies for the very category of what it means to be human The contributors in this book explore in depth the argument that one of the most important aspects of popular culture is to naturalize or normalise a certain social order by further entrenching the expectations of social behaviour upon which our mentalities of rule are founded This work will be of interest to student and scholars of international relations popular culture and security studies

Romantic narratives in international politics Alexander Spencer, 2016-07-01 Introducing insights from literary studies and narratology into international relations this study examines the romantic narratives of pirates in Somalia rebels in Libya and private military and security companies in Iraq

Identity Change and Foreign Policy Linus Hagstrom, 2015-10-05 Identity has become an explicit focus of International Relations theory in the past two to three decades with one case attracting and puzzling many early identity scholars Japan These constructivist scholars typically ascribed Japan a pacifist or antimilitarist identity an identity which they believed was constructed through the adherence to peaceful norms and antimilitarist culture Due to the alleged resilience of such adherences little change in Japan's identity and its international relations was predicted However in recent years Japan's foreign and security policies have begun to change in spite of these seemingly stable norms and culture This book seeks to address these changes through a pioneering engagement with recent developments in identity theory In particular most chapters theorize identity as a product of processes of differentiation Through detailed case analysis they argue that Japan's identity is produced and reproduced but also transformed through the drawing of boundaries between self and other In particular they stress the role of emotions and identity entrepreneurs as catalysts for identity change With the current balance between resilience and change contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon This book was originally published as a special issue of *The Pacific Review*

International Relations as Politics among People Hannes Hansen-Magnusson, 2019-11-25 Pioneering a hermeneutic methodology for analyses of global governance this is the first monograph that makes Hans Georg Gadamer's and Paul Ricoeur's hermeneutic philosophy relevant for global politics research Drawing on the concept of horizon as the element that captures the dynamics of understanding in social interaction in order to analyse processes of international politics this book shows that what is required is the embeddedness of meanings and ideas in human action and reflection By advancing theory building with regard to particular questions of global governance it reconceptualises international relations as politics among people Providing a contextualised constructivist approach that highlights the importance of processes to which people are central it challenges the use of collective concepts such as state

and nation as units of analysis which continue to dominate international relations but which cloud the details of interaction processes The two case studies of UN Convention on the Law of the Sea and Germany in NATO's mission Operation Allied Force in Kosovo in 1999 are structured around this contextualised constructivist approach developed in the monograph The studies reveal how interaction processes can be made accountable leading to new vantage points of our understanding of governance problems This book will be of interest to scholars interested in global governance the work of Hans Georg Gadamer Paul Ricoeur and hermeneutic philosophy the UN humanitarian interventions and foreign policy analysts Topics on Art and Money Adriá Harillo Pla, 2021-07-06 The title of this book is intended to be an honest one far from exaggerated phrases and empty meanings Three words a preposition and a coordinating conjunction Topics on Art and Money A coordinating conjunction not a subordinating one since this book does not intend to express a hierarchical order As all words united by a coordinating conjunction this book intends to connect them As simple as that This book presents through the chapters written by its authors some of the ways in which Art and Money are linked In order to observe this relationship this book consists of authors whose analysis refers to political propaganda historical events with artistic repercussions or strictly economic analysis of the art market for example And connects or divides This book not only presents a connection between Art and Money but between academics from different fields and geographical areas This humble book presents precisely how individuals from different specialties think of this relationship It will appeal to academics dedicated to Arts Economics and Cultural Management professionals from the art market world with an interest in works of an academic nature and general readers with an interest in this topic and a strong knowledge of Arts Economics **The SAGE Handbook of the History, Philosophy and Sociology of International Relations** Andreas Gofas, Inanna Hamati-Ataya, Nicholas Onuf, 2018-07-30 The SAGE Handbook of the History Philosophy and Sociology of International Relations offers a panoramic overview of the broad field of International Relations by integrating three distinct but interrelated foci It retraces the historical development of International Relations IR as a professional field of study explores the philosophical foundations of IR and interrogates the sociological mechanisms through which scholarship is produced and the field is structured Comprising 38 chapters from both established scholars and an emerging generation of innovative meta-theorists and theoretically driven empiricists the handbook fosters discussion of the field from the inside out forcing us to come to grips with the widely held perception that IR is experiencing an existential crisis quite unlike anything else in its hundred year history This timely and innovative reference volume reflects on situated scholarly practices in a way that projects our collective thinking into the future PART ONE THE INWARD GAZE INTRODUCTORY REFLECTIONS PART TWO IMAGINING THE INTERNATIONAL ACKNOWLEDGING THE GLOBAL PART THREE THE SEARCH FOR AN IDENTITY PART FOUR INTERNATIONAL RELATIONS AS A PROFESSION PART FIVE LOOKING AHEAD THE FUTURE OF META ANALYSIS **Discovering Childhood in International Relations** J. Marshall Beier, 2020-06-13 This book examines how and why in the context of

International Relations children's subjecthood has all too often been relegated to marginal terrains and children themselves automatically associated with the need for protection in vulnerable situations as child soldiers refugees and conflated with women all typically with the accent on the Global South Challenging us to think critically about childhood as a technology of global governance the authors explore alternative ways of finding children and their agency in a more central position in IR in terms of various forms of children's activism children and climate change children and security children and resilience and in their inevitable role in governing the future Focusing on the problems pitfalls promises and prospects of addressing children and childhoods in International Relations this book places children more squarely in the purview of political subjecthood and hence more centrally in IR **Politics in Fantasy Media** Gerold Sedlmayr, Nicole Waller, 2014-10-21

Fantasy is often condemned as escapist unsophisticated and superficial This collection of new essays puts such easy dismissals to the test by examining the ways in which Fantasy narratives present diverse politically relevant discourses gender race religion or consumerism and thereby serve as indicators of their real world contexts Through their depiction of other worlds allegedly disconnected from our own these texts are able to actualize political attitudes Instead of categorizing Fantasy either as conservative or progressive the essays suggest that its generic peculiarity allows the emergence of productive forms of oscillation between these extremes Covered are J R R Tolkien's *The Lord of the Rings* George R R Martin's *A Song of Ice and Fire* sequence J K Rowling's *Harry Potter* novels the vampire TV series *True Blood* and the dystopian computer game *Fallout 3* Security, Risk and the Biometric State Benjamin Muller, 2010-02-25 This book examines a series of questions associated with the increasing application and implications of biometrics in contemporary everyday life In the wake of the events of 9 11 the reliance on increasingly sophisticated and invasive technologies across a burgeoning field of applications has accelerated giving rise to the term biometric state This book explores how these virtual borders are created and the effect they have upon the politics of citizenship and immigration especially how they contribute to the treatment of citizens as suspects Finally and most importantly this text argues that the rationale of governing through risk facilitates pre-emptory logics a negligent attitude towards false positives and an overall proliferation of borders and ubiquitous risk which becomes integral to contemporary everyday life far beyond the confined politics of national borders and frontiers By focusing on specific sites such as virtual borders in airports trusted traveller programs like the NEXUS program and those delivered by airlines and supported by governmental authorities TSA and CATSA respectively this book raises critical questions about the emerging biometric state and its commitment and constitution vis vis technology of governing through risk This book will be of interest to students of biopolitics critical security surveillance studies and International Relations in general Benjamin J Muller is assistant professor in International Relations at Simon Fraser University Burnaby Canada He completed his PhD in the School of Politics and International Studies at Queen's University Belfast Northern Ireland in 2005 *Global and Regional Problems* Vilho Harle, 2016-04-22 Distinctive due to explicit and systematically developed links between

international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies

Understanding Popular Culture and World Politics in the Digital Age Laura J. Shepherd, Caitlin Hamilton, 2016-05-20 The practices of world politics are now scrutinised in a way that is unprecedented with even those previously or conventionally assumed to be disengaged from international affairs being drawn into world politics by social media Interactive websites allow users to follow election results in real time from the other side of the world and online mapping means that the world out there is now available on your mobile phone *Understanding Popular Culture and World Politics in the Digital Age* engages these themes in contemporary world politics to better understand how digital communication through new media technologies changes our encounters with the world Whether the focus is digital media social networking or user generated content these sites of political activity and the artefacts they produce have much to tell us about how we engage world politics in the contemporary age This volume represents the starting point of a dialogue about how digital technologies are beginning to impact the research and practice of scholars and practitioners in the field of International Relations with the collection of cutting edge essays dealing specifically with the intertextuality of world politics and digital popular culture This book will be of use to International Relations research academics and critically engaged publics interested in the core themes of global politics subjectivity militarism humanitarianism civil society organisation and governance The book also employs theories and techniques closely associated with other social science disciplines including political theory sociology cultural studies and media studies
