Haydn Piano Sonata D Major Analysis:

Analysis of 18th- and 19th-century Musical Works in the Classical Tradition David Beach, Ryan C. McClelland, 2012

Analysis of 18th and 19th Century Musical Works in the Classical Tradition is a textbook for upper level undergraduate and graduate courses in music analysis. It outlines a process of analyzing works in the Classical tradition by uncovering the construction of a piece of music: the formal, harmonic, rhythmic, and voice leading organizations as well as its unique features. The text develops an in-depth approach that is applied to works by composers including Haydn, Mozart, Beethoven, Schubert, Schumann, and Brahms. The book begins with foundational chapters in music theory starting with basic diatonic harmony and progressing rapidly to more advanced topics such as phrase design, phrase expansion, and chromatic harmony. The second part contains analyses of complete musical works and movements. The text features over 150 musical examples including numerous complete annotated scores. Suggested assignments at the end of each chapter guide students in their own musical analysis.

A Topical Guide to Schenkerian Literature David Carson Berry, 2004. To the growing list of Pendragon Press publications devoted to the work of Heinrich Schenker, we wish to announce the addition of this much-needed bibliography. The author, a student of Allen Forte, has created a work useful to a wide range of researchers: music theorists, musicologists, music librarians, and teachers. The Guide is the largest Schenkerian reference work ever published. At nearly 600 pages, it contains 3600 entries: 2200 principal, 1400 secondary, representing the work of 1475 authors. Fifteen broad groupings encompass seventy topical headings, many of which are divided and subdivided again, resulting in a total of 271 headings under which entries are collected.

Advanced Schenkerian Analysis David Beach, 2013-06-19. Advanced Schenkerian Analysis: Perspectives on Phrase, Rhythm, Motive, and Form is a textbook for students with some background in Schenkerian theory. It begins with an overview of Schenker's theories, then progresses systematically from the phrase and their various combinations to longer and more complex works. Unlike other texts on this subject, Advanced Schenkerian Analysis combines the study of multi-level pitch organization with that of phrase rhythm, the interaction of phrase and hypermeter, motivic repetition at different structural levels, and form. It also contains analytic graphs of several extended movements, separate works, and songs. A separate Instructor's Manual provides additional advice and solutions, graphs of all recommended assignments.

Graphic Music Analysis Eric Wen, 2019-02-14. Graphic Music Analysis presents Schenkerian analysis in a practical and engaging manner that will resonate with musicology theory and composition students as well as performing musicians. With over 650 musical examples, Eric Wen guides students through the step-by-step process of creating graphic representations of music and reveals how Schenkerian ideas evolve out of analytical issues in the works encountered. Rather than promoting an analytic method for its own sake, Wen derives structural techniques from their particular musical situations to help students engage directly with the music. The textbook has an online companion website, textbooks.rowman.com/wen, featuring full scores and recordings of the works discussed in the book. Downloadable workbook of additional pieces.

Musical Listening in the German Enlightenment Matthew Riley, 2017-07-05 The silent attentiveness expected of concert audiences is one of the most distinctive characteristics of modern Western musical culture This is the first book to examine the concept of attention in the history of musical thought and its foundations in the writings of German musical commentators of the late eighteenth century Those critics explained numerous technical features of the music of their time as devices for arousing sustaining or otherwise influencing the attention of a listener citing in illustration works by Gluck C P

E Bach Georg Benda and others Two types of attention were identified the uninterrupted experience of a single emotional state conveyed by a piece of music as a whole and the fleeting sense of wonder or astonishment induced by a local event in a piece The relative validity of these two modes was a topic of heated debate in the German Enlightenment encompassing issues of musical communication compositional integrity and listener competence Matthew Riley examines the significant writers on the topic Descartes Leibniz Wolff Baumgarten Rousseau Meier Sulzer and Forkel and provides analytical case studies to illustrate how these perceived modes of attention shaped interpretations of music of the period
