The Sacred Project of American Sociology Christian Smith, 2014-07-03 Counter to popular perceptions contemporary American sociology is and promotes a profoundly sacred project at heart Sociology today is in fact animated by sacred impulses driven by sacred commitments and serves a sacred project Sociology appears on the surface to be a secular scientific enterprise its founding fathers were mostly atheists Its basic operating premises are secular and naturalistic Sociologists today are disproportionately not religious compared to all Americans and often irreligious The Sacred Project of American Sociology shows counter intuitively that the secular enterprise that everyday sociology appears to be pursuing is actually not what is really going on at sociology s deepest level Christian Smith conducts a self reflexive tables turning cultural and institutional sociology of the profession of American sociology itself showing that this allegedly secular discipline ironically expresses Emile Durkheim s inescapable sacred exemplifies its own versions of Marxist false consciousness and generates a spirited reaction against Max Weber s melancholically observed disenchantment

of the world American sociology does not escape the analytical net that it casts over the rest of the ordinary world Sociology itself is a part of that very human very social often very sacred and spiritual world And sociology's ironic misrecognition of its own sacred project leads to a variety of arguably self-destructive and distorting tendencies This book reasserts a vision for what sociology is most important for in contrast with its current commitments and calls sociologists back to a more honest fair and healthy vision of its purpose

Alternative Sociologies of Religion James V

Spickard, 2018-03-06 Uncovers what the sociology of religion would look like had it emerged in a Confucian Muslim or Native American culture rather than in a Christian one Sociology has long used Western Christianity as a model for all religious life As a result the field has tended to highlight aspects of religion that Christians find important such as religious beliefs and formal organizations while paying less attention to other elements Rather than simply criticizing such limitations James V Spickard imagines what the sociology of religion would look like had it arisen in three non-Western societies What aspects of religion would scholars see more clearly if they had been raised in Confucian China What could they learn about religion from Ibn Khaldun the famed 14th century Arab scholar What would they better understand had they been born Navajo whose

traditional religion certainly does not revolve around beliefs and organizations Through these thought experiments Spickard shows how non Western ideas understand some aspects of religions even of Western religions better than does standard sociology The volume shows how non Western frameworks can shed new light on several different dimensions of religious life including the question of who maintains religious communities the relationships between religion and ethnicity as sources of social ties and the role of embodied experience in religious rituals These approaches reveal central aspects of contemporary religions that the dominant way of doing sociology fails to notice Each approach also provides investigators with new theoretical resources to guide them deeper into their subjects The volume makes a compelling case for adopting a global perspective in the social sciences
