Ethics and International Curriculum Work Robert J. Helfenbein, Terrence C. Mason, 2012-08-01 The widely cited though highly contested idea that the world is flat Friedman 2004 carries with it a call for education to provide a leveling effect across continents and cultures Students in Skokie or in Skopje as the theory goes are expected to experience a school curriculum that shares certain common elements goals and purposes Such a globalized view is not however without its complications This book addresses some of the issues that arise when the transmigration of educational ideas occurs with a particular eye toward the ethical dilemmas that curriculum workers face in international contexts The authors who have contributed to this volume explore through case examples and critical reflection what happens when ideas that are drawn from one set of cultural norms and experiences is introduced into other cultural contexts In many cases these are the stories of donors and hosts of structured inequities of power and influence of disparities in material resources and as expressed in one of the cases the dynamics of the colonizer and the colonized A recurrent theme concerns the challenges faced by educators working internationally to reconcile their own ethical predispositions toward equity and cultural responsiveness with certain tacit assumptions about the appropriateness or value of curriculum practices brought from the developed world for teachers and students in the developing world How these dilemmas are navigated forms the content of this collection of reports from the field written by those who engage in this complex and important work While the content of this volume is situated at the intersection between the field of curriculum studies and comparative education it is fundamentally a book about curriculum Most of the authors come from various disciplinary backgrounds with specializations in curriculum development in content areas such as social studies geography or mathematics As outsiders looking in on the field of international education and with thoughtful reflections grounded in practice the authors provide a new set of insights into the challenges of international curriculum work Finally since many of the questions raised by the work included here are ethical in nature the book begins and ends with analyses that link the practical realities presented in the cases with contemporary philosophical thought This then can be seen as the primary contribution of the book to the educational literature as it offers a careful and well articulated synthesis of theory and practice in the field of international curriculum work This publication would make an important contribution to courses in curriculum theory and practice comparative and international education and international development outside of the field of education **Insdoc List** ,1961 **ICHSS 2021** Herman J Waluyo, Sarwiji Suwandi, Heru Kurniawan, 2022-10-10 The International Conference of Humanities and Social Science ICHSS 2021 aims to encourage and provide opportunities for researchers and academics to exchange views and

Applied Olfactory Cognition Gesualdo M Zucco, Benoist Schaal, Mats Olsson, Ilona Croy, 2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to which the study of olfaction

is now contributing A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it References Bushdid C Magnasco M Vosshall L Keller A 2014 Humans can discriminate more than 1 trillion olfactory stimuli Science 343 1370 1372
