Holding on to Good Ideas in a Time of Bad Ones: Six Literacy Principles Worth Fighting For Thomas Newkirk,

Reading for Pleasure Kenny Pieper, 2016-12-01 In Reading for Pleasure Kenny Pieper has gathered a range of tried and tested strategies to get kids reading and enjoying it We hear too often that kids don't read any more Kenny thinks it should be every teacher's mission to prove this isn't true In a squeezed curriculum it can be tempting to accept pupils' lack of reading and make excuses that there is not enough time to give to the luxury of personal reading Teachers do this at our peril Reading is the essential building block of further literacy development as well as a skill hobby and habit that we can take with us forever Kenny Pieper takes the act of reading for granted as many but sadly not all adults do You're reading this right now However this isn't the case for everyone Kenny teaches kids whose lives are terrifying obstacle courses of reading related problems They know they struggle with reading so they try to avoid reading at all costs They leave school not merely unaffected by this strange reading thing but saddled with a great deal of emotional baggage about being an outsider even more entrenched in a belief that reading is for others more intelligent than them Then there are the children who can read perfectly well but chose not to unconvinced of the importance of reading in their lives What difference does it make to them We have to answer that question in school We have a duty to put an end to illiteracy and aliteracy Kids need reading role models and as a teacher that role model is you You may be the only adult who that reluctant reader will ever see reading Teachers are critical in giving all children the gift of being able to read well and to value reading Topics covered include the author's personal reading journey how reading enabled him to become the first person in his family to go to university and convinced him that fostering a love of reading is his moral duty as an educator illiteracy and aliteracy reluctant readers book reviews prioritising personal reading by devoting ten minutes each lesson to it habitual reading the reading environment interest inventories technology e readers Accelerated Reader programmes recommended reading building a class library bookmarks book tweets book speed dating libraries librarians literacy and class inequality parental involvement podcasting reading records reading dialogue journals the rights of the reader reading aloud silent reading and literacy and gender amongst others The benefits we can all reap when kids become confident readers who read for pleasure are obvious Discover strategies which will get kids talking about books get them thinking about books get them reading books encourage independent reading develop literacy skills and establish a classroom culture where reading is expected and celebrated Suitable for primary and secondary teachers leaders and SENCOs or just anyone with an interest in or responsibility for getting kids to read The Bloomsbury Handbook of Reading Perspectives and Practices Bethan Marshall, Jackie Manuel, Donna L. Pasternak, Jennifer Rowsell, 2020-10-15 Shortlisted for the UK Literacy Association's Academic Book Award 2021 The Bloomsbury Handbook of Reading Perspectives and Practices focuses on the experiences of reading from a young age to maturity and the different ways reading is encountered in other words the processes involved as well as the outcomes

The international group of experts within both teaching and academia focuses on reading in school how is it taught What is taught How is it assessed Controversial issues are explored the acquisition of phonics teaching the canon including or ignoring digital texts the advent of standards based tests The contributions also consider people s biographies of reading their memories of reading in school and their current views on literature Together this well edited volume provides a more complete view of reading than is currently on offer exploring all aspects of what it means to be literate and how we define being literate

In the Best Interest of Students Kelly Gallagher,2023-10-10 In his new book *In the Best Interest of Students* Staying True to What Works in the ELA Classroom teacher and author Kelly Gallagher notes that there are real strengths in the Common Core standards and there are significant weaknesses as well He takes the long view reminding us that standards come and go but good teaching remains grounded in proven practices that sharpen students literacy skills Instead of blindly adhering to the latest standards movement Gallagher suggests Increasing the amount of reading and writing students are doing while giving students more choice around those activitiesBalancing rigorous high quality literature and non fiction works with student selected titlesEncouraging readers to deepen their comprehension by moving beyond the four corners of the text Planning lessons that move beyond Common Core expectations to help young writers achieve more authenticity through the blending of genresUsing modeling to enrich students writing skills in the prewriting drafting and revision stagesResisting the de emphasis of narrative and imaginative reading and writingAmid the frenzy of trying to teach to a new set of standards Kelly Gallagher is a strong voice of reason reminding us that instruction should be anchored around one guiding question What is in the best interest of our students

Whatever Happened to Language Arts? David Booth,2009 This insightful book explores how reading and writing instruction has evolved and examines a wealth of teaching and learning techniques including group reading reading and writing workshops and phonics and grammar

Pedagogy, Praxis and Purpose in Education C.M. Mulcahy,D.E. Mulcahy,D.G. Mulcahy,2014-12-05 Recent years have shown the growth of federal legislation and programs having a profound impact on educational policy and practice and a decline in reliance on broadly based educational justifications Paralleling this development has been the emergence of well endowed and influential private foundations and an increase in corporate influence in shaping policy In this volume the authors consider the discourse rhetoric and underlying values that sustain these developments alongside those that underlie more longstanding and competing educational theories and practices This volume highlights the importance of recognizing opposing conceptualizations of education some more educationally productive than others and their core values approaches to student learning strengths and weaknesses and justification The authors analyze and critique what Jane Roland Martin has referred to as the deep structure of educational thought and seek improved educational policy and practice with particular reference to curriculum and pedagogy It features a comparative analysis of competing discourses including autocratic control limited personal development and praxis
