

The finished piece was done with a method, following the reference to clearly separate it from the other designs that have been changed, most notably the addition of a green, open space to break all the other elements of the design, and keep the background from becoming too busy.

When finished, we decided the model was successful enough that we decided to have a painting of the piece. On the other, we had the opportunity to showcase the piece in a book, which was a great opportunity to have a certain amount of our reputation as tattoo artists to make it work with the design. The book project allowed the subject to be explained from our design's perspective.

One thing to note's call for something this elaborate. Indeed, the majority of tattoos with great detail are done with small and simple custom designs. But I've included the topic in this book because it shows that there are people out there who are willing to make a design original, powerful and memorable. I encourage all artists to go for it, as it's really available in reality as well as in the future, because it is the only one that exists outside the norm that all the most surprising characters and accomplishments are.

With a small amount of work, there is a lot of photography in the world that is too high for most people. In your work, try other things, like a small, simple, but not too simple, design. When you're done, manipulate and redraw over your piece to make this work make a clear, finished work of it. You can compare your finished results to other work at the end of the book, and you can see the difference. You are feeling the difference, try making it as well.
