Zonderland,Richard J. Boucherie,Erwin W. Hans,Nikky Kortbeek,2021-03-29 This book presents healthcare logistics solutions that have been successfully implemented at a variety of healthcare facilities In each case a major challenge is presented along with the solution approach and implementation steps followed by the impact on hospital operations Problems encountered when implementing the results in practice are also discussed Much of the work presented is drawn from the experiences of members of the Center for Healthcare Operations Improvement and Research CHOIR at Twente along with the CHOIR spin off company Rhythm *Enterprise Information Systems* Slimane Hammoudi,Michał Śmiałek,Olivier Camp,Joaquim Filipe,2019-07-27 This book constitutes extended revised and selected papers from the 20th International Conference on Enterprise Information Systems ICEIS 2018 held in Funchal Madeira Portugal in March 2018 The 19 papers presented in this volume were carefully reviewed and selected for inclusion in this book from a total of 242 submissions They deal with topics such as data science and databases ontologies social networks knowledge management software development human computer interaction and multimedia *MEDINFO 2015: eHealth-enabled Health* Andrew Georgiou,Paulo Mazzoncini de Azevedo Marques,2015-09-15 Health and Biomedical Informatics is a rapidly evolving multidisciplinary field one in which new developments may prove crucial in meeting the challenge of providing cost effective patient centered healthcare worldwide This book presents the proceedings of MEDINFO 2015 held in S o Paulo Brazil in August 2015 The theme of this conference is eHealth enabled Health and the broad spectrum of topics covered ranges from emerging methodologies to successful implementations of innovative applications integration and evaluation of eHealth systems and solutions Included here are 178 full papers and 248 poster abstracts selected after a rigorous review process

from nearly 800 submissions by 2 500 authors from 59 countries The conference brings together researchers clinicians technologists and managers from all over the world to share their experiences on the use of information methods systems and technologies to promote patient centered care improving patient safety enhancing care outcomes facilitating translational research and enabling precision medicine as well as advancing education and skills in Health and Biomedical Informatics This comprehensive overview of Health and Biomedical Informatics will be of interest to all those involved in designing commissioning and providing healthcare wherever they may be

Healthcare System Access Nicoleta Serban, 2019-11-21 A guide to a holistic approach to healthcare measurement aimed at improving access and outcomes Healthcare System Access is an important resource that bridges two areas of research access modeling and healthcare system engineering The book's mathematical modeling approach highlights fundamental approaches on measurement of and inference on healthcare access This mathematical modeling facilitates translating data into knowledge in order to make data driven estimates and projections about parameters patterns and trends in the system The complementary engineering approach uses estimates and projections about the system to better inform efforts to design systems that will yield better outcomes The author a noted expert on the topic offers an in depth exploration of the concepts of systematic disparities reviews measures for systematic disparities and presents a statistical framework for making inference on disparities with application to disparities in access The book also includes information health outcomes in the context of prevention and chronic disease management In addition this text Integrates data and knowledge from various fields to provide a framework for decision making in transforming access to healthcare Provides in depth material including illustrations of how to use state of art methodology large data sources and research from various fields Includes end of chapter case studies for applying concepts to real world conditions Written for health systems engineers Healthcare System Access Measurement Inference and Intervention puts the focus on approaches to measure healthcare access and addresses important enablers of such change in healthcare towards improving access and outcomes
