Bridging the Gap Melinda Moore, 2010 U S policymakers have stepped up systematic disaster preparedness efforts sharply since the terrorist attacks of September 11 2001 including the creation of the U S Department of Homeland Security and a plethora of federal initiatives Against a backdrop of natural disasters that occur each year in the United States and heightened concern about pandemic influenza there is an emerging national consensus that the best path is an all hazards approach to disaster preparedness planning and that effective local planning is critical Military installations and their civilian counterparts local government and local health care providers especially the U S Department of Veterans Affairs can strengthen local level disaster preparedness planning This is an interim report for the first phase of a larger study aiming to develop a planning support tool for local military and civilian planners It describes current policies and programs especially those with nationwide application for domestic emergency preparedness risk analysis and capabilities based planning It also describes results from interviews with local military and civilian planners at five selected sites to help understand how local preparedness planning currently operates and identify the needs of local planners Collectively these form the basis for a proposed tool for which the framework is described in this report The next phase of the study will include development and field testing of a proof of concept prototype of the tool

Digital Transformation in Architecture and Construction , 2025-05-28 The theme aimed at technological transformation in the construction industry currently encompasses different sectors from the project development stage to the final building maintenance period The Building Information Modelling BIM methodology is currently the main driver of incentive for the transformation of construction contributing to integrating software and professionals in developing the various activities involved Collaborative design in the field of health and safety in construction can be increased with the implementation of BIM supported by good practice guides Integrating Integrated Project Delivery IPD and big open BIM systems promotes an adequate synergy in a

complementary performance focused on the maintenance and simulation activity of the construction process contributing positively to increasing the digital perspective in practice. Additionally, the connection of BIM and Virtual Reality VR technologies adds value to the development of the architectural and engineering project, promoting the optimization of the final construction product. The identification and management of conflicts between disciplines inherent to the project are currently supported by using BIM software with detailed diagnostic capabilities, namely the VOSviewer software. In conclusion, the process of technological transformation is underway all over the world and in all activities and should be known and learned by construction professionals, namely architects and engineers.
