This book is a response to the dangers posed to constitutional democracy by the continuous growth of executive power and the simultaneous decline of parliaments role in policy formation These phenomena are often manifested in the manipulation and even the violation of the rules of parliamentary law making called irregularities If left without consequences these irregularities can ultimately lead to the elimination of the procedural constraints imposed on the ruling political forces to prevent their arbitrary exercise of power This work investigates the constitutional significance of the irregularities of parliamentary law making and explores the role that courts play in the remedy of these flaws The analysis is premised on the concept of equilibrium This explanatory concept denotes an ideal state in which parliamentary law making complies with the

requirements of constitutionalism and judicial review is conceptualized as a mechanism suitable to achieve this aim The volume places the judicial review of the regulation and the practice of parliamentary law making at its center and discusses all the relevant legal concepts institutions and doctrines It combines theoretical analysis with case law centered comparative research covering a large number of decisions delivered by apex courts operating in various jurisdictions Due to this methodological choice the book aims to simultaneously contribute to the scholarly discourse and provide useful information to practicing lawyers and policymakers working in the areas of constitutional law and politics and comparative law

Tomaselli, 2025-06-30 This book brings together a selection of articles that have been published throughout a series of special issues of the journal Critical Arts South North Cultural and Media Studies that originally focused on the so called ethnographic turn in contemporary arts An increasing wave of art events has occurred since the 1990s that have displayed significant similarities with anthropology and ethnography in their theorizations of cultural difference and representational practices The aim of these works was to revisit the ethnographic turn in contemporary art by bringing together contributions from theorists artists and critics to engage critically with the ethnographic perspective in their work This focus on the ethnographic turn has been expanded in subsequent special issues to explore how culture and society can be critically explored and challenged through the detour of art how contemporary art practices engage with participation interaction and technology in an increasingly digital screen culture and what the role can be of critical art to conceptualize contest and or develop an engaged and critical pedagogy This collection aims to re-expose the special issues to an international audience by presenting a non exhaustive selection of articles that exemplify the

different perspectives and discussions that are tackled throughout It starts with three of the introductory articles that have attracted large readerships and that give a detailed introduction for the special issues The compilation ends with three so called Vignettes these are short statements and reflections by artists about their practice which are an important feature of the special issues

What Is Design? Anne J. Banks, 2005-06-13 This book is an overview of the process of design as it has evolved from the earliest visual images and artifacts from prehistory to our modern practice of design Originally written as a textbook for design students and design professionals it is also oriented to the general public interest in the design arts and the fine arts Every object has a story to tell about its period in time its culture its maker and ways of making This thought was the idea behind the making of this book that we can read this story through the interpretation of the forms of objects Important influences on modern design have come from the Bauhaus and the French decorative arts However what the designer does is best expressed in the work of American industrial designer Norman Bel Geddes Excerpt page 55 Bell Geddes believed that design is primarily a matter of thinking and of envisioning how the customer would use the product While every product has a specific solution Bel Geddes instituted market research as an essential part of the design process In his redesign of the counter scale for the Toledo Scale Company he changed hand weights to a spring mechanism cast iron to aluminum enclosed the skeleton body in a white enamel shell and made the scale flush with the counter for ease of use while retaining its basic function Bel Geddes major innovation was the redesign of the Standard gas stove from a stylized furniture form to a single unit encased in clean white enamel Rethinking the stove as a skyscraper grid hung with steel plates he simplified the manufacturing process by creating twelve interchangeable components to form sixteen different models
