Image Processing of Edge and Surface Defects Roman Louban, 2009-09-16 The human ability to recognize objects on various backgrounds is amazing Many times industrial image processing tried to imitate this ability by its own techniques This book discusses the recognition of defects on free form edges and homogeneous surfaces My many years of experience has shown that such a task can be solved efficiently only under particular conditions Inevitably the following questions must be answered How did the defect come about How and why is a person able to recognize a specific defect In short one needs an analysis of the process of defect creation as well as an analysis of its detection As soon as the principle of these processes is understood the processes can be described mathematically on the basis of an appropriate physical model and can then be captured in an algorithm for defect detection This approach can be described as image processing from a physicist's perspective I have successfully used this approach in the development of several industrial image processing systems and improved upon them in the course of time I would like to

present the achieved results in a hands on book on the basis of edge based algorithms for defect detection on edges and surfaces I would like to thank all who have supported me in writing this book *Material Forming* Lukasz Madej, Mateusz Sitko, Konrad Perzynski, 2023-04-25 These proceedings present papers on Additive Manufacturing Composites Forming Processes Extrusion and Drawing Forging and Rolling Formability of Metallic Materials Friction and Wear in Metal Forming Incremental and Sheet Metal Forming Innovative Joining by Forming Technologies Lionel Fourment MS on Optimization and Inverse Analysis in Forming Machining and Cutting Material Behavior Modelling New and Advanced Numerical Strategies for Material Forming Non Conventional Processes Polymer Processing and Thermomechanical Properties Sustainability on Material Forming and Property Controlled Forming **British Museum Catalogue of printed Books** ,1897 **Catalog of Copyright Entries.
