

UNC Charlotte Agilent ADS Tutorial (Project 1)

Overview

First, form project groups for the semester.

The objective of the tutorial is to become familiar with the basics of Agilent ADS software.

NOTE: Use the [Project Report Template](#) and keep answers to questions on consecutive sheets of paper with all plots at the end.

IN NO CASE may code or files be exchanged between students, and each student must answer the questions themselves and do their own plots, NO COPYING of any sort! Nevertheless, students are encouraged to collaborate in the lab session.

Only turn in requested plots (**Pxx**) and requested answers to questions (**Qxx**).

Part I

- Start the software:
 - From a Linux terminal, ADS should be available in the menu (Mosaic->Engineering->Electrical->Agilent->ADS)
 - From a PC terminal, you must first open a remote Linux session, (Start->AllPrograms->Mosaic->LinuxConnect->GraphicalSess.Auto->LinuxAuto), then proceed as for a Linux terminal
 - For snapshots use the Linux menu **Graphics->Ksnapshot** and select the option to take a legible snapshot of a window rather than full screen
 - On occasion, HP/ADS may have an illegible pop-up pane when you first run ADS. The safe way to handle this is to proceed to a Linux workstation and read the message. On PC's the problem is caused by a missing font, and a risky fix is to click the lower left button. In older software versions, this usually results in choosing the default initialization of RF/digital setup.
 - Note: (this note may not be valid after 2009) If you find that you have printing problem, see if you have a file ".XprinterDefaults" in your home directory. Move this file to ".XprinterDefaultsOld", and restart ADS ... it will write a new copy of this file that should enable printing.
if this does not work, move your current ".XprinterDefaults" file to ".XprinterDefaultsOld", and try downloading [XprinterDefaults](#) to your home directory. (To download you may need to hold down the "shift key" while you click on the link.) Select the LPDEST printer by File-->PrintSetup-->Options and select Default Printer (SLPDEST) on default_queue
- After ADS starts ou should get a starting window similar to this:

Measurement and Modeling of Silicon Heterostructure Devices John D. Cressler,2018-10-03 When you see a nicely presented set of data the natural response is How did they do that what tricks did they use and how can I do that for myself Alas usually you must simply keep wondering since such tricks of the trade are usually held close to the vest and rarely divulged Shamefully ignored in the technical literature measurement and modeling of high speed semiconductor devices is a fine art Robust measuring and modeling at the levels of performance found in modern SiGe devices requires extreme dexterity in the laboratory to obtain reliable data and then a valid model to fit that data Drawn from the comprehensive and well reviewed Silicon Heterostructure Handbook this volume focuses on measurement and modeling of high speed silicon heterostructure devices The chapter authors provide experience based tricks of the trade and the subtle nuances of measuring and modeling advanced devices making this an important reference for the semiconductor industry It includes easy to reference appendices covering topics such as the properties of silicon and germanium the generalized Moll Ross relations the integral charge control model and sample SiGe HBT compact model parameters
