Committee on Commerce, Science, and Transportation, 1997 Competency-Based Education in Aviation Suzanne K. Kearns, Timothy J. Mavin, Steven Hodge, 2017-05-15 Whether a trainee is studying air traffic control piloting maintenance engineering or cabin crew they must complete a set number of training hours before being licensed or certified The aviation industry is moving away from an hours based to a competency based training system Within this approach training is complete when a learner can demonstrate competent performance Training based on competency is an increasingly popular approach in aviation It allows for an alternate means of compliance with international regulations which can result in shorter and more efficient training programs However there are also challenges with a competency based approach The definition of competency based education can be confusing training can be reductionist and artificially simplistic professional interpretation of written competencies can vary between individuals and this approach can have a high administrative and regulatory burden *Competency Based Education in Aviation Exploring Alternate Training Pathways* explores this approach to training in great detail considering the four aviation professional groups of air traffic control pilots maintenance engineers and cabin crew Aviation training experts were interviewed and have contributed professional insights along with personal stories and anecdotes associated with competency based approaches in their fields Research based and practical strategies for the effective creation delivery and assessment of competency based education are described in detail

Introduction to Maintenance, Repair and Overhaul of Aircraft, Engines and Components Shevantha Weerasekera, 2020-12-29 *Introduction to Maintenance Repair and Overhaul of Aircraft Engines and Components* brings together the basic aspects of a fundamentally important part of the aerospace industry the one that supports the global technical efforts to keep passenger and cargo planes flying reliably and safely Over time aircraft components and structural parts are subject to environmental effects such as corrosion and other types of material deterioration wear and fatigue Such parts could fail in service and affect the safe operation of the aircraft if the degradation were not detected and addressed in time Regular planned maintenance supports the current and future value of the aircraft by minimizing the physical decline of the aircraft and engines throughout its life *Introduction to Maintenance Repair and Overhaul of Aircraft Engines and Components* was written by the industry veteran Shevantha K Weerasekera an aerospace engineer with 20 years of aircraft maintenance experience who currently leads the engineering team of a major technical enterprise in the field **Industrial Aviation Management** Martin Hinsch, 2018-09-07 This book outlines the structure and activities of companies in the European aviation industry The focus is on the design production and maintenance of components assemblies engines and the aircraft itself In contrast to other industries the technical aviation industry is subject to many specifics since its activities are highly regulated by the European Aviation Safety Agency EASA the National Aviation Authorities and by the aviation

industry standard EN 9100 These regulations can influence the companies organization personnel qualification quality management systems as well as the provision of products and services This book gives the reader a deeper up to date insight into today s quality and safety requirements for the modern aviation industry Aviation specific interfaces and procedures are looked at from both the aviation legislation standpoint as well as from a practical operational perspective *Technical Publications for Army Air Forces Field Technical Libraries* ,1943 **Civil Aeronautics Board Reports** United States.
