The History of Rhetoric and the Rhetoric of History Nancy S. Struever, 2023-05-31 In the articles collected here Nancy Struever explores the basic assumption that rhetoric is not simply a bag of persuasive tricks but functions necessarily as a mode of inquiry investigating not simply the mechanics of production and reception of discourse but the psychological factors of reason and passion engaged by the assertion modification and contest of beliefs and dispositions of the civil communities The first section looks both at contemporary historians employing rhetorical constructs and tactics and at contemporary accounts of the employment of rhetorical pedagogical material and theoretical texts in medieval and Renaissance cultural practices The second set of articles considers change and continuity in the rhetorical exploitation s of genre forms in cultural programs focuses on the strong reorientation of Classical forms of moral inquiry on the ingenious use of the proverb of etymology of the exemplum as well as on the changes in strategies in the theater the novel and art criticism The final section deals with the strong historical interconnections of rhetoric with other disciplines the motives and investigative tactics of medicine and rhetoric in the Renaissance and Early Modernity and the shared interests and interwoven careers of rhetoric and law

Phenomenologies of the City Henriette Steiner, Maximilian Sternberg, 2016-03-09 Phenomenologies of the City Studies in the History and Philosophy of Architecture brings architecture and urbanism into dialogue with phenomenology Phenomenology has informed debate about the city from social sciences to cultural studies Within architecture however phenomenological inquiry has been neglecting the question of the city Addressing this lacuna this book suggests that the city presents not only the richest but also the politically most urgent horizon of reference for philosophical reflection on the cultural and ethical dimensions of architecture The contributors to this volume are architects

and scholars of urbanism Some have backgrounds in literature history religious studies and art history The book features 16 chapters by younger scholars as well as established thinkers including Peter Carl David Leatherbarrow Alberto P rez Gomez Wendy Pullan and Dalibor Vesely Rather than developing a single theoretical statement the book addresses architecture s relationship with the city in a wide range of historical and contemporary contexts The chapters trace hidden genealogies and explore the ruptures as much as the persistence of recurrent cultural motifs Together these interconnected phenomenologies of the city raise simple but fundamental questions What is the city for how is it ordered and how can it be understood The book does not advocate a return to a naive sense of unity or order Rather it investigates how architecture can generate meaning and forge as well as contest social and cultural representations

Information Technology in the Teaching of History Allan Martin,Lez Smart,David Yeomans,2013-11-26 Information technology offers powerful tools to facilitate and to assist learning across the whole curriculum the computer is certainly the most significant development in educational technology in the twentieth century History may be thought of as a staid and perhaps tradition bound subject more resistant to change than some areas Yet in history too information technology is making an impact This volume shows how information technology is currently contributing to and bringing about changes in the way history is taught and learned The international selection of the contributions shows that these phenomena are not restricted to just one country The impact of information technology on history curricula is explored in depth in one section of the book whilst other sections focus on classroom activities and issues on the development of software for history and on the relevance of current information technology developments But the question which lies at the heart of it all remains that of how information technology can enhance the teacher s ability to offer situations in which learners can form and develop a real understanding of the nature of historical processes and the ways in which they can be studied
