From News to Talk Kimberly Meltzer,2019-03-25 From News to Talk examines what journalists think about the movement toward often opinionated sometimes uncivil talk in news It provides an important intervention in debates about the future of news by investigating what journalists themselves perceive as the forces affecting this movement the effects of this shift on audiences and political culture and how the movement from news to talk affects their roles and authority in society Drawing on more than thirty interviews with journalists and other industry professionals and a decade of published journalistic materials Kimberly Meltzer uncovers the technological economic cultural and political forces affecting the movement toward opinion and commentary or talk in television online print and radio news From CNN s Brian Stelter to Fox Business Network s Maria Bartiromo the Washington Post s Paul Farhi and many other journalists from CBS USA Today POLITICO and HuffPost the interviewees are key figures in journalism Her analysis centers around several key case studies including the increase in opinionated talking heads on television and the ushering in of a new era of talk and entertainment programs the strategy by CNN to broaden its definition of news by adding non news programs and the bevy of star journalists starting their own self branded sites

Platform Neutrality Rights Hannibal Travis,2024-07-24 This book analyzes questions of platform bias algorithmic filtering and ranking of Internet speech and declining perceptions of online freedom Courts have intervened against unfair platforms in important cases but they have deferred to private sector decisions in many others particularly in the United States The First Amendment human rights law competition law Section 230 of the Communications Decency Act and an array of state and foreign laws address bad faith conduct by Internet platforms or other commercial actors Arguing that the problem of platform neutrality is similar to the net neutrality problem the book discusses the assault on freedom of speech that emerges from public private partnerships The book draws parallels between U S constitutional and statutory doctrines relating to shared spaces and the teachings of international human rights bodies relating to the responsibilities of private actors It also connects the dots between new rights to appeal account or post removals under the Digital Services Act of the European Union and a variety of fair treatment obligations of platforms under American and European competition laws public accommodations laws and public utilities laws Analyzing artificial intelligence AI regulation from the point of view of social media and video platform users the book explores overlaps between European and U S efforts to limit algorithmic censorship or shadow banning The book will be of interest to students and scholars in the field of cyberlaw the law of emerging technologies and AI law

Religion and Artificial Intelligence Beth Singler,2024-10-31 Artificial intelligence AI is rarely out of the news or the public imagination Images of red eyed Terminators illustrate press accounts of incremental advances in medical diagnosis facial recognition natural language processing and robotics Such advances are transforming society through measurable impacts on people s decisions and

opportunities Religion and Artificial Intelligence An Introduction explores an emerging field with a religious studies approach drawing on cultural and digital anthropological methods to demonstrate the entanglements of religion and AI our imaginaries of these objects and our ideas about their utopian or dystopian futures It addresses key topics including the following What AI is and is not How religions are reacting to AI with examples of rejection adoption and adaptation How established religions understand creation and place human like AI within that How overtly secular and even new atheist groups understand AI as a tool for liberation from human evolution and religion Religious visions of superintelligent AI This engaging book is essential for anyone considering the relationship between religion science and technology and interested in the questions raised by transhumanism posthumanism and new religious movements **Class War, Then and Now:**

Essays toward a New Left Chris Wright,2025-07-30 Nearly fifty years of outright class war against America s working and middle classes have brought the country to the brink of social and political collapse According to some sources 60 percent of Americans live paycheck to paycheck Since 1975 80 trillion have been transferred from the bottom 90 percent of earners to the top 1 percent Meanwhile little action is being taken to mitigate global warming and ecological destruction while military budgets used in part to wage disastrous wars and genocides climb annually There isn t much hope for the United States or indeed for civilization unless we can forge an international left that prioritizes class struggle above all else It is time to fight back by any means necessary against a ruling class interested in nothing but profits and power In this book a historian of the U S labor movement attempts to advance this agenda through a series of essays on everything from right wing libertarianism to the inadequacies of identity politics from the career of Jimmy Hoffa to the catastrophic consequences of American imperialism Victory in a war for the future of humanity is far from assured but we re lucky enough to be living in a time when there s still some hope It is our duty to act on this hope *The Algorithmic Distribution of News* James Meese,Sara Bannerman,2022-09-22 This volume explores how governments policymakers and newsrooms have responded to the

algorithmic distribution of the news Contributors analyse the ongoing battle between platforms and publishers evaluate recent attempts to manage these tensions through policy reform and consider whether algorithms can be regulated to promote media diversity and stop misinformation and hate speech Chapter authors also interview journalists and find out how their work is changing due to the growing importance of algorithmic systems Drawing together an international group of scholars the book takes a truly global perspective offering case studies from Switzerland Germany Kenya New Zealand Canada Australia and China The collection also provides a series of critical analyses of recent policy developments in the European Union and Australia which aim to provide a more secure revenue base for news media organisations A valuable resource for journalism and policy scholars and students Governing the Algorithmic Distribution of News is an important guide for anyone hoping to understand the central regulatory issues surrounding the online distribution of news **Public**
