Some of My Friends Are. Deborah Plummer, 2019-01-22 A thoughtful examination of cross racial friendships how to develop them why

they're difficult to maintain and how they foster meaningful conversations about race. Surveys have shown that the majority of people believe cross racial friendships are essential for improving race relations. However, further polling reveals that most Americans tend to gravitate toward friendships within their own race. Psychologist Deborah L. Plummer examines how factors such as leisure, politics, humor, faith, social media, and education influence the nature and intensity of cross racial friendships. Inspiring and engaging, Plummer draws from focus groups, statistics, and surveys to provide insight into the fears and discomforts associated with cross racial friendships. Through personal narratives and social analyses of friendship patterns, this book gives an insightful look at how cross racial friendships work and fail within American society. Plummer encourages all of us to examine our friendship patterns and to deepen and strengthen our current cross racial friendships. If you have ever wondered why genuine cross racial friendships are challenging to develop and maintain in our racially polarized society and why they are essential to racial reconciliation, read this thoughtful book.

Interpreting American Military History at Museums and Historic Sites Marc K. Blackburn, 2016-04-08. Across the country, museums and historic sites welcome visitors into a world long gone but fundamental to America today. Military history in particular is etched into our country's culture and the public's imagination. The trouble, though, for museums and historical sites lies in continuing to make it both accessible and relevant to today's audiences. Through *Interpreting American Military History at Museums and Historic Sites*, Marc K. Blackburn tackles the difficult task of helping those institutions charged with the care of sites, collections, and stories that relate to our past, relatable while still maintaining the dignity and reverence of their rich history. Looking at the various components of American military history, such as battles and famous figures, Blackburn provides alternatives to the traditional museum experience. The 21st century is a culmination of the past, and it is more important than ever to remember and learn from the triumphs and failures, and this guide provides and explains those strategies for making our stories and collections relevant to modern audiences. This book acts as a primer for those unfamiliar with academic trends of the last forty years. Historiography of American military history, like that of other subfields, shifts as new information surfaces or as perspectives change. Blackburn modernizes this area through new

interpretative methods as well as through case studies of museums and historic sites that have created programs interpretive media outreach strategies and mission goals updated to meet the needs of today's patrons Armed with these strategies historic institutions will have the foundation to provide compelling relevant and engaging experiences for the 21st century audience

how the bureaucratic swamp really operates and how unaccountable power has been concentrated deep within the administrative state resulting in dysfunction Executive agencies were created to implement legislation and presidential directives yet career civil servants use them to advance their own agendas instead Congress often writes laws broadly letting subject matter experts at administrative agencies fill in the details with regulations Then agency employees sometimes substitute their own policy preferences for actual statutory or regulatory language They may also fail to appreciate that their authority is delegated from an official who answers to the president Bernhardt gives examples of federal employees undermining the administration's policies simply by refusing to work on a task slow walking it or doing a subpar job Administrative agencies have further gained power through judicial deference to an agency's own interpretation of a statute when its enforcement action is challenged Courts essentially abdicate their role of interpreting the law leaving citizens with little recourse against penalties or prohibitions Both legislative and judicial powers have thus been shifted to the executive branch where they are exercised without adequate political oversight Drawing on his experiences working under two administrations Bernhardt explains how President Trump's enabling leadership showed a path for reining in the administrative state He calls on political leadership to turn off autopilot and take control of their agencies and on Congress and the judiciary to assert their constitutional authority before an unaccountable federal bureaucracy destroys the Founders' vision of government by consent of the governed
