UTILIZE THE LATEST ADVANCES IN SATELLITE AND RADAR IMAGING FOR SMOOTH SAFE FLIGHT OPERATIONS Recent breakthroughs in radar and satellite imaging and communications technology have put a tremendous amount of potentially life saving weather related data at a pilot s disposal This heavily illustrated expertly written resource explains how to obtain interpret and effectively apply all this information Radar Satellite Weather Interpretation For Pilots thoroughly describes the usefulness as well as limitations of radar and satellite imaging in flight planning and operations and offers in depth coverage of key topics such as Geographical Features Weather Features Interpretation and Application Maps and Codes Equipment Reviews Lightning Detection Equipment Image Illustrations Flight Planning Strategies Risk Evaluation And more You ll also find reference information and maps to help plot radar locations and lists to decode location identifiers Although Radar Satellite Weather Interpretation for Pilots includes an in depth review of satellite and weather radar fundamentals as applied to flight it is far more than a collection of facts it is a working tool that teaches pilots solid decision making and risk assessment skills The author who is a former FAA Weather Specialist and a consultant for NASA includes valuable case study examples of misinterpretation and prevention techniques as well as actual weather scenarios used to apply flight planning strategies If you are looking for clear and up to date information on satellite and radar weather interpretations for flight operations your search ends here Aviation Weather Information Requirements Study ,2000 The Aviation Safety Program AvSP has as its goal an improvement in aviation safety by a factor of 5 over the next 10 years and a factor of 10 over the next 20 years Since weather has a big impact on aviation safety and is associated with 30% of all aviation accidents Weather Accident Prevention WxAP is a major element under this program The Aviation Weather Information A WIN Distribution and Presentation project is one of three projects under this element This report contains the findings of a study conducted by the Georgia Tech Research Institute GTRI under the Enhanced Weather Products effort which is a task under A WIN The study examines current aviation weather products and their application The study goes on to identify deficiencies in the current system and

to define requirements for aviation weather products that would lead to an increase in safety. The study also provides an overview of the current set of sensors applied to the collection of aviation weather information. New modified or fused sensor systems are identified which could be applied in improving the current set of weather products and in addressing the deficiencies defined in the report. In addition, the study addresses and recommends possible sensors for inclusion in an electronic pilot reporting EPIREP system.

Pilot's ready to use instant weather guide. Fly safely in all weather conditions as you master the flying skills and strategies of expert aviators. Terry Lankford's *Aviation Weather Handbook* gives you flying strategies for every imaginable weather condition: low ceilings and visibility due to haze, smog, dust, sand, smoke, and ash; turbulence; icing; and other cold weather phenomena; thunderstorms; wind shear; and more. You learn basic weather theory and how to interpret area TWEB, route terminal aerodrome, and winds and temperatures aloft forecasts. Find out how to get the most from FAA and other weather briefing services and about the reporting systems for which pilots are responsible. This user-friendly guide is organized by weather condition for quick look-up. The appropriate flying strategies appear with each hazard, as does the fundamental theory needed to put it all together.
