British Battleship vs Italian Battleship Mark Stille,2020-01-23 During World War II s battle for control of the Mediterranean both the British and Italian navies planned to bring their battle fleets into play At the centre of both of these fleets was a core of battleships which both sides expected to play a decisive role in the conflict On 9 July 1940 the two navies met in the central Mediterranean as two Italian battleships faced off against three of their British counterparts Christened the Battle of Calabria the action allowed the ships to play to their strengths engaging in a long range gunnery duel the very thing they had been designed for Though both sides shot well the only hit was scored by Warspite on the Italian battleship Giulio Cesare The Italians were forced to withdraw and the action ended up being indecisive but it was the largest fleet action fought in the Mediterranean during the war As well as this battle there were other occasions during the war when both British and Italian battleships were present and influential but during which they never engaged each other directly the Battle of Spartivento on 27 November 1940 and the Battle of Cape Matapan on 28 29 March 1941 Packed with full colour artwork carefully selected archive photographs and expert analysis this title explores in detail the role played by British and Italian battleships in these encounters and their influence in the Mediterranean theatre of World War II

Military Model Scene USS Constitution, 44-gun frigate, 1797 Kerry Jang, 2025-08-30 The ShipCraft series provides in depth information about building and modifying model kits of famous warships In general these cover plastic and resin models of 20th century subjects but like the previous volumes on Nelson's Victory and Captain Bligh's Bounty this is a radical departure not only a period sailing ship but one for which kits are available in many different materials and scales This requires some changes to the standard approach but the main features of the series remain constant Now preserved in

Boston harbour USS Constitution is the oldest commissioned warship still afloat One of the original building programme of 1794 for the newly established US Navy the ship would enjoy a stellar career beginning with the Quasi War with France and the campaigns against the Barbary states of north Africa However it was the War of 1812 that established the fame of the ship that became known as Old Ironsides following her victories over two British frigates and a number of smaller warships a potent symbol of national pride that kept the ship in commission until the 1880s In the course of this long service the ship's appearance was altered significantly and many of the features of the ship as commonly modelled are actually the product of later and not historically consistent reconstructions A major achievement of this volume is to detail these changes as accurately as evidence allows and to reconstruct the probable colour schemes carried at the most significant stages of her career The modelling section reviews the strengths and weaknesses of available kits lists commercial accessory sets for super detailing and provides hints on modifying and improving the basic kit including the complexities of rigging This is followed by an extensive photographic gallery of selected high quality models in a variety of scales and coverage concludes with a section on research references books monographs large scale plans and relevant websites Following the pattern of the series this book provides an unparalleled level of visual information paint schemes models line drawings and photographs and is simply the best reference for anyone setting out to model this famous frigate
