Human Factors Challenges in Emergency Management Christine Owen, 2017-09-29 This book provides an overview of state of the art research that has been conducted within Australia funded by the Bushfire Cooperative Research Centre The chapters source and contextualize their own research practice within the context of the international research literature Therefore while the research has occurred within Australia it will be of particular interest to scholars students and practitioners in a number of other countries particularly within the United States of America and in Europe The fire and emergency services is a particularly large industry in Australia alone it employs 250 000 personnel yet there is very little by way of published human factors books addressing this sector directly Emergency events frequently involve problems for which there may be unanticipated consequences and highly interdependent consequential effects In short emergency events are not necessarily as containable as may be work in other domains As Karl Weick once commented emergency events do not play by the rules This means that these research chapters tell us something about a potential future world of work that is highly dynamic interdependent and for which improvisation and critical thinking and problem solving are necessary pre requisites The discussions about individual and team

performance will also be pertinent to others working in similar high reliability high consequence domains The chapters connect into an integrated body of work about individual and group performance and their limitations **Engineering Psychology and Human Performance** Christopher D. Wickens,William S. Helton,Justin G. Hollands,Simon Banbury,2021-09-27 Forming connections between human performance and design this new edition of Engineering Psychology and Human Performance examines human machine interaction The book is organized directly from a psychological perspective of human information processing and chapters correspond to the flow of information as it is processed by a human being from the senses through the brain to action rather than from the perspective of system components or engineering design concepts Upon completing this book readers will be able to identify how human ability contributes to the design of technology understand the connections within human information processing and human performance challenge the way they think about technology s influence on human performance and show how theoretical advances have been or might be applied to improving human machine interactions This new edition includes the following key features A new chapter on research methods Sections on interruption management and distracted driving as cogent examples of applications of engineering psychology theory to societal problems A greatly increased number of references to pandemics technostress and misinformation New applications Amplified emphasis on readability and commonsense examples Updated and new references throughout the text This book is ideal for psychology and engineering students as well as practitioners in engineering psychology human performance and human factors The text is also supplemented by online resources for students and instructors
