**(Re)Configurations** Heriberto Cairo, Breno Bringel, 2019-05-31 This book seeks to develop our understanding of the contemporary geopolitical reconfigurations of two regions of the world system with high cultural affinity and traditional close relations Latin America and Europe Relations between Latin America and Europe have been interpreted generally in the social sciences as synonyms of interstate relations However although States remain the most important actor in the geopolitical scene they have been deeply reconfigured in recent decades impacted by transnational dynamics politics and spaces This book highlights interregional relations and transnational dynamics between Latin America and Europe from a critical geopolitics perspective promoting a new look for interregional relations which encompasses international cooperation

and development global policies borders inequalities and social movements It brings attention to the relevance of interregionalism in the current geopolitical reconfiguration of the world system but also argues for systematic inclusion of relevant new social actors and imaginaries in this traditional sphere of states These social actors particularly social movements and practices of contestation are developing not only international bonds but a new transnational field where networks defy traditional territorial orders This volume seeks to generate a new discussion among scholars of geopolitics international relations social theory and social movement studies by encouraging a development of an interregional and transnational perspective of the two regions

The Colorblind Screen Sarah E. Turner, Sarah Nilsen, 2014 The election of President Barack Obama signaled for many the realization of a post racial America a nation in which racism was no longer a defining social cultural and political issue While many Americans espouse a colorblind racial ideology and publicly endorse the broad goals of integration and equal treatment without regard to race in actuality this attitude serves to reify and legitimize racism and protects racial privileges by denying and minimizing the effects of systematic and institutionalized racism In The Colorblind Screen the contributors examine television's role as the major discursive medium in the articulation and contestation of racialized identities in the United States While the dominant mode of televisual racialization has shifted to a colorblind ideology that foregrounds racial differences in order to celebrate multicultural assimilation the volume investigates how this practice denies the significant social economic and political realities and inequalities that continue to define race relations today Focusing on such iconic figures as President Obama LeBron James and Oprah Winfrey many chapters examine the ways in which race is read by television audiences and fans Other essays focus on how visual constructions of race in dramas like *24* *Sleeper Cell* and *The Wanted* continue to conflate Arab and Muslim identities in post 9 11 television The volume offers an important intervention in the study of the televisual representation of race engaging with multiple aspects of the mythologies developing around notions of a post racial America and the duplicitous discursive rationale offered by the ideology of colorblindness

**North American Integration** Gaspare M. Genna, David A. Mayer-Foulkes, 2013-07-18 The course of events since the implementation of NAFTA has had unexpected elements with significant impacts on North American integration First has been the rise of China as a larger source of imports and production partner than Mexico Second has been the rise of security concerns since September 11 2001 The result has been much stronger integration between Canada and the US than with Mexico Migration issues are now linked with security which has risen to a top priority in the international agenda While liberalization has furnished strong economic incentives for integration it has not provided a sufficient guide for the political process which requires leadership and appropriate institutions to coordinate and regulate the special interest groups A coherent and effective North American integration would be a valuable asset in the context of global integration and competition yet the issues involved are quite complex and varied

North American Integration An Institutional Void in Migration Security and Development examines the current state of North

American integration Editors Gaspare M Genna and David A Mayer Foulkes gather an international group of experts to give a broad coherent picture of the current multifaceted process of integration and find that institutional development is an essential component Divided into three sections the book Discuss the determinants of integration and shows that the institutional characteristics of the three countries including democracy and basic rights are the most important Provides examples of institutional building in contexts for which institutions are lacking specifically labor migration and health issues Examines issues such as overall security arrangements trade drug related violence energy and the continuing wage gap among the countries which have an important bearing on integration *21st Century Philosophy* James Ward,2019-08-26

**Marxism, Christianity, and Islam** Julian Roche,2024-02-20 Roger Garaudy was for many years at the centre of the French Communist Party but was eventually expelled for his liberal views In the Seventies he strove to bring Marxism and Christianity together to include all humanity in a project to set all people free What emerges from Garaudy s project is a very modern Marxism with its emphasis on the individual its ecological politics and in its insistence on religion as central to human emancipation Although Garaudy himself became frustrated by the failure of Marxism and converted to Islam eventually resulting in his work being discredited in the West it is certainly possible that Garaudy s project represents a good perhaps even the best starting point for Marxism in today s world

**Whose Crisis, Whose Future?** Susan George,2013-09-04 Crisis Whose crisis Today we are in the midst of a multifaceted crisis which touches the lives of everyone on the planet Whether it s growing poverty and inequality or shrinking access to food and water the collapse of global financial markets or the dire effects of climate change every aspect of this crisis can be traced to a transnational neoliberal elite that has steadily eroded our rights and stripped us of power And

yet our world has never been so wealthy and we have right now all the knowledge tools and skills we need to build a greener fairer richer world Such a breakthrough is not some far fetched utopia but an immediate concrete possibility Our future is in our hands

Faith-Based Policy John Chandler,2013-12-16 In 2001 George W Bush created the White House Office of Faith Based and Community Initiatives The driving force behind the policy was to create a level playing field where faith based organizations could compete on an equal footing with secular organizations for government funding of social aid programs Given on the one hand the continuation of faith based policy under Barack Obama and on the other the continued support by the vast majority of the American people for some form of such policy the need has emerged to clearly understand what this policy is and the issues that it raises Why First because the policy reveals new paradigms that explode traditional political and religious designations such as conservative liberal or evangelical progressive Secondly it is a policy which is setting precedents that with time will only become more entrenched in the institutional fabric of American government and the values of the culture Finally it does not seem to be a policy that is likely to just go away And if it won t go away then how should responsible policy be conducted While John Chandler s Faith Based Policy A Litmus Test for Understanding Contemporary America responds to this need to understand it also acknowledges that there is already a substantial amount of documentation available which taken together provides a comprehensive though sometimes biased picture of faith based policy This book contributes a relatively brief impartial analysis that draws on and synthesizes the available information More specifically in order to dissipate the confusion surrounding the perceptions that many have had concerning the intention and meaning of the policy this book provides insight into 1 the theological visions of the faith based actors behind the policy 2 how these actors have tried to apply these visions as the program has evolved in the 2000s 3 the divisiveness and debate that has characterized the faith based experiment and 4 how all of the above may be held up for contemplation by the reader as a mirror of developing American culture

**Theology and Climate Change** Paul Tyson,2021-03-30 Theology and Climate Change examines Progressive Dominion Theology PDT as a primary cultural driver of anthropogenic climate change PDT is a distinctive and Western form of Christian theology out of which the modern scientific revolution and technological modernity arises Basic attitudes to nature to instrumental power over nature and to an understanding of humanity s relationship with nature are a function of the deep theological preconditions of Western modernity Much of what we like about Western modernity is indebted to PDT at the same time that this tacit cultural theology is propelling us towards climate disaster This text argues that the urgent need to change the fundamental operational assumptions of our way of life is now very hard for us to do because secular modernity is now largely unaware of its tacit theological commitments Modern consumer society including the global economy that supports this way of life could not have the operational signatures it currently has without its distinctive theological origin and its ongoing submerged theological assumptions Some forms of Christian theology are now acutely aware of this dynamic and are determined to change the modern life world from first assumptions up in order to

avert climate disaster At the same time that other forms of Christian theology aligned with pragmatic fossil fuel interests advance climate change skepticism and overtly uphold PDT Theology is in fact crucially integral with the politics of climate change but this is not often understood in anything more than simplistic and polemically expedient ways in environmental and policy contexts This text aims to dis imbed climate change politics from polarized and unfruitful slinging matches between conservatives and progressives of all or no religious commitments This fascinating volume is a must read for those with an interest in environmental policy concerns and in culturally embedded first order belief commitments *Injustice*

Wahhabism is often understood as a radical version of Islam responsible for inspiring and motivating Islamic terrorism *Western Imaginings* The Intellectual Contest to Define Wahhabism is an inquiry into how Wahhabism has been understood and represented by Western intellectuals particularly those belonging to the neo conservative and liberal traditions In contrast to the existing literature that treats Wahhabism as a historical phenomenon or a monolithic theological ideology a literature often written by authors keen to promote geopolitical interests or with ideological axes to grind Davis s work considers Wahhabism as a discursive construct crafted and popularized by a Western intellectual elite This comprehensive study speaks to how and why Western intellectuals have chosen to represent Wahhabism in specific ways ranging from an analysis of the particular rhetorical techniques employed by these intellectuals to a consideration of the religious and political beliefs that inspire and motivate their decisions *Western Imaginings* is aimed at students of political philosophy intellectual traditions and sociology media and policy professionals and anyone interested in how Islamic doctrines like Wahhabism have been represented in an international context framed by a heightened anxiety about radical Islam

**Hijacking History** Kathleen Wellman,2021-08-18 *Hijacking History* analyzes the high school world history textbooks

produced by the three most influential publishers of Christian educational materials and their collective effect on students understanding of the past and its consequences for the present In assuming that God sanctions fundamentalist positions on social political and economic issues students are led to believe that that the ultimate mission of America is to advance evangelical Christianity and capitalism throughout the world with monumental civic ramifications

**The Spirit of Philadelphia** Alain Supiot,2020-05-05 In 1944 the International Labour Organization laid out its Declaration of Philadelphia a full fledged social bill of rights in the same spirit as FDR s State of the Union address of the same year The welfarist spirit was then at its apex but Supiot argues that with neoliberalism still rampant even following the economic crash the Declaration remains an important baseline Then as now social ties had been compromised in favor of market values now as then the law must be reorganized to uphold social values and the spirit of solidarity Short punchy and often rousing The Spirit of Philadelphia describes the worldwide triumph of neoliberalism as once communist elites turn towards market dogma and the privatization of welfare states Arguing against the return to social Darwinism and the bureaucratic embrace of numbers and statistics as ends Supiot champions the social democratic spirit hoping for its revival in the wake of the recent crash

*Injustice* Danny Dorling,2015-06-03 In the five years since the first edition of *Injustice* there have been devastating increases in poverty hunger and destitution in the UK Globally the richest 1% have never held a greater share of world wealth while the share of most of the other 99% has fallen in the last five years with more and more people in debt especially the young Economic inequalities will persist and continue to grow for as long as we tolerate the injustices which underpin them This fully rewritten and updated edition revisits Dorling s claim that Beveridge s five social evils are being replaced by five new tenets of injustice elitism is efficient exclusion is necessary prejudice is natural greed is good and despair is inevitable By showing these beliefs are unfounded Dorling offers hope of a more equal society We are living in the most remarkable and dangerous times With every year that passes it is more evident that *Injustice* is essential reading for anyone concerned with social justice and wants to do something about it
