The prevalence of burnout among clinical physiotherapists in the United States^{1-2,7-8}, and Australia⁴ has been documented. Schuster *et al*⁸ surveyed 176 physiotherapists in the United States and found that about 53% believed they were experiencing burnout. In a similar sample of Australian physiotherapists with more than five years experience (reported by Scutter and Goold⁴), 35% of the subjects were found to have moderate to high levels of emotional exhaustion. In another sample of 129 physiotherapists working in rehabilitation hospitals in the United States, the majority of whom had three years or less experience, about 72% of the sample had moderate to high scores on the emotional exhaustion subscale. Twenty percent of the same sample scored high on the depersonalisation subscale, and 60%

Maslach Burnout Inventory Questionnaire Scoring:

Occupational Stress Sally Hardy, Jerome Carson, Ben L. Thomas, 1998 This book presents a unique theoretical and practical overview of the issues relating to stress and burnout among healthcare professionals Occupational stress offers guidance and advice on many subjects including the maintenance of a healthy workforce *Handbook of Occupational Health and Wellness* Robert J. Gatchel, Izabela Z. Schultz, 2012-12-21 This book integrates the growing clinical research evidence related to the emerging transdisciplinary field of occupational health and wellness It includes a wide range of important topics ranging from current conceptual approaches to health and wellness in the workplace to common problems in the workplace such as presenteeism absenteeism common illnesses job related burnout to prevention and intervention methods It consists of five major parts Part I Introduction and Overviews provides an overview and critical evaluation of the emerging conceptual models that are currently driving the clinical research and practices in the field This serves as the initial platform to help better understand the subsequent topics to be discussed Part II Major Occupational Symptoms and Disorders exposes the reader to the types of critical occupational health risks that have been well documented as well as the financial and productivity losses associated with them In Part III Evaluation of Occupational Causes and Risks to Workers Health a comprehensive evaluation of these risks and causes of such occupational health threats is provided This leads to Part IV Prevention and Intervention Methods which delineates methods to prevent or intervene with these potential occupational health issues Part V Research Evaluation Diversity and Practice concludes the book with the review of epidemiological measurement diversity policy and practice issues with guidelines on changes that are needed to decrease the economic and health care impact of illnesses in the workplace and recommendations for future All chapters provide a balance among theoretical models current best practice guidelines and evidence based documentation of such models and guidelines The contributors were carefully selected for their unique knowledge as well as their ability to meaningfully present this information in a comprehensive manner As such this Handbook is of great interest and use to health care and rehabilitation professionals management and human resource personnel researchers and academicians alike **Health literacy and disease prevention, volume II** Sudip Bhattacharya, Ozden Gokdemir, Deep Shikha, Ferdinando Petrazzuoli, Poonam Kushwaha, 2024-03-06 This Research Topic is a follow on from the Topic Editors successful volume I The term health literacy was coined by Ratzan et al in the 1970s providing the minimal health education required in schools however this term is almost new and in the early phase of development Though many attempts have been made in the past to define health literacy WHO construed it as the cognitive and social skills which determine the motivation and ability of individuals to gain access to understand and use information in ways which promote and maintain good health Health literacy not only focuses on the individual behavior oriented communication but also on the various determinants of health such as environmental social and political factors thus it is ahead in the concept of health education If health education

methods go beyond the bounds of information diffusion and bring about interaction participation and critical analysis such kind of approach will lead to improved health literacy personal aid and social benefit by enabling adequate community action and contributions to the advancement of social capital

Emotional functioning and post-traumatic outcomes in the aftermath of a traumatic event Marialaura Di Tella,Lorys Castelli,Annunziata Romeo,2023-01-31 *Quality of Life in Academia: New Perspectives for Assessing and Promoting Wellbeing in University Population* Barbara Loera,Andreina Bruno, Sara Viotti ,Imke Hindrichs,Lara Bertola,2025-01-21 Over the last 20 years changes in higher education have stimulated research on academic working life Indeed the application of a market oriented system and new public management policies in higher education have increased the emphasis on internationalization accountability and management of academic work These changes have increased the complexity of the academic work profile which is characterized by teaching research and institutional demands including public engagement to strengthen the interaction between university industry and society The COVID 19 pandemic introduced far reaching challenges that have further increased the psychosocial work demands Universities continue to face continuous and rapid changes that have led to increased levels of work related stress for both teaching and research academic staff TRAS and technical and administrative staff TAS This scenario has also had a negative impact on the academic life and well being of university students

From West to East: Recent Advances in Psychometrics and Psychological Instruments in Asia Mengcheng Wang,Yiyun Shou,Joseph Wu,Hui-Fang Chen,Cheng-Ta Yang,Kazuhisa Takemura,2022-03-03 **Maslach Burnout Inventory** Christina Maslach,Susan E. Jackson,Michael P. Leiter,2013 **How Workplace Behaviors Impact Mental Health: Does Diversity Matter?** Vasiliki Eirini Chatzea,Dimitra Sifaki-Pistolla,Enkeleint A. Mechili,2025-05-14 The recent unprecedented societal challenges along with the COVID 19 pandemic have opened the door to a new era for mental health at work Today more than ever provides an opportunity to highlight the mental health challenges that employees are facing due to their working conditions and occupational environments Around the globe it is well documented that promoting and establishing mentally

healthy workplaces is a focal point. However, according to the literature, individuals of diverse identities and backgrounds (e.g. racial or ethnic minorities, LGBTQ community, migrants, refugees, the Roma community, religiously diverse individuals, people of lower economic social status, pregnant women, etc.) are presenting an increased risk of discrimination and stigma, leading to major adverse effects on their mental health. Where mental health conditions can begin and worsen in the workplace due to occupational conditions and behaviors, the impact of this continues outside of the workplace and can severely impact an individual's overall quality of life. This Research Topic aims to offer a holistic insight into the current state of mental health conditions/disorders among employees of diverse or minority groups before, during, and post the COVID-19 pandemic. This collection not only aims to capture the extent of the mental health impact and report on common work-related mental health disorders (e.g. depression, stress, distress, anxiety, burnout, low well-being, poor quality of life, etc.) amongst these populations but to open the discussion towards addressing and tackling the inequalities and stigma associated with protected characteristics in workplace environments and to propose preventive measures/interventions to enhance workplace resilience and ensure that mental health is upheld for all, both in and outside of the workplace. In addition, mapping out the current issues and needs by providing data and policy measures is crucial in meeting the United Nations' 3.4 Universal Health Coverage goal regarding promoting populations' mental health and well-being.

American Journal of Mental Retardation, 2008. Includes the association's conference proceedings and addresses Psychology of Burnout. Rachel V. Schwartzhoffer, 2009. A large proportion of today's workforce finds itself coping with major responsibilities at home as well as rising expectations and demands on the job. The combination of work and family demands often leads to time pressure and conflict. As a result, a growing number of employees in today's organisations are suffering from burnout, a stress syndrome characterised by emotional exhaustion, depersonalisation, and diminished personal accomplishment. Burnout has consequences for family outcomes, including diminished positive affect, increased marital conflicts, and feelings of stress among family members. Effects on work outcomes have also been reported, such as diminished work performance and organisational commitment and increased absenteeism levels. In response to this problem, a broad array of research has focused on factors that reduce burnout, labelled as social support. This new book gathers the latest research from around the globe in this field.
