Follow the Chemistry Lai Yoong Goh,2010 This autobiography presents a personal account of the life of a woman academic over a span of 60 years from incidents in her childhood through the education process from primary to pre university education in British Malaya to two doctorates from University College London As the story unfolds it is immediately apparent that her journey in academia has been far from ordinary She gives credit to the excellent early education she received in Ipoh a medium sized town in Malaya from highly qualified and dedicated nuns and teachers in the Convent of the Holy Infant Jesus Hers was a career carved out by Providence as she drifted to various international centers of learning depending on the sponsorship of scholarships available at the time Her drive and passion for chemistry actually with

other attributes as well allowed her to rub shoulders with some of the best minds in the field Her association with numerous colleagues mentors and scientists unintentionally and unknowingly laid the groundwork for a sort of global networking which in turn influenced her career path in subtle yet significant ways This proved immensely useful later as she balanced the rigorous demands of teaching research and family She has shown that it is not impossible for a woman to make a success of family and life in academia Indeed her story will encourage young women venturing into science and academia It also shows that developing countries more than their developed counterparts have a good deal to gain from their professional citizens by removing obstacles such as unduly early mandatory retirement and poor support for active researchers It is a refreshing glimpse into the author s generation in science and academia and a repository of important insights for students and scientists in developing and emerging economies *Uglish: Dictionary of Ugandan English* Bernard Sabiiti,2015-01-11
