Ways of Nature Pany Decossard, 2023-12-13 In Ways of Nature Dr D cossard articulates the first theory of evolution since Darwin By his own account he stumbled upon his proposed mechanism of eukaryogenesis using a process worthy of the three princes of Serendip From there he succeeded in establishing a comprehensive theory of life and the universe For instance we learn that a new paradigm called the seeds first theory explains biodiversity among eukaryotic species such as those of plants and animals It is interesting to discover what contributions if any the theory of natural selection provided to the new model Nevertheless the modern version of Darwinism or neo Darwinism has long been engaged in a major antagonism with the

Human Health, Third Edition Michael Newman, 2021-12-01 The amazing complexity of human anatomy and physiology is dependent upon its single most basic unit the cell Humans can attribute their overall health to homeostasis the balance of activity within properly functioning cells Additionally cells are affected by the food we eat along with the microscopic entities that make us ill Cells and Human Health Third Edition covers how cells work to maintain human health and immunity as well as the history of cell discovery and the basics of cellular activity Readers will also learn the processes of illnesses and corresponding genetics that compromise a cell's proper activity in the human being **Fever Year** Don Brown, 2019 In graphic novel format looks at the 1918 worldwide flu epidemic [La Nature en Action](#) Pany Décossard, 2025-04-07 Dans La Nature en Action Dr D cossard articule la première théorie de l'évolution depuis Darwin Il rapporte qu'il est arrivé au mécanisme proposé de l'eucaryotisme en utilisant un processus digne des trois princes de Serendip partir de l'idée d'instaurer une théorie globale de la vie et de l'univers L'auteur définit les êtres vivants comme des entités basées nucléotidiques douées de propriétés autocatalytiques Les cellules eucaryotes découlent de la fusion de virus et de bactéries selon la théorie de l'ascendance bilatérale de l'eucaryotisme Est aussi exposée dans le livre une nouvelle théorie de la formation des espèces très différente de la théorie de la sélection naturelle de Charles Darwin La théorie de la précession des semences explique le mode de formation des lignées eucaryotes Ces dernières évoluent ensuite par recombinaison génétique induite par les rétrotransposons lesquels agissent au niveau du génome suivant un mécanisme copier-coller Le changement de configuration des lignées au cours du temps c'est ce que nous appelons évolution Une évolution qui se fait de concert avec la pente croissante de l'entropie de l'univers Le livre propose aussi de nouvelles théories en physique La singularité du Big Bang est une sphère dont l'intérieur constitue une des dimensions Les deux autres dimensions sont données l'une par la composante électrique et l'autre par la composante magnétique de l'onde électromagnétique EM La gravité provient aussi en partie des ondes EM émises par un corps La fréquence de ces ondes est plus

grande le plus proche du corps et diminue en intensité avec la distance selon la loi du carré inverse Ce qui explique l'apparente équivalence de la gravité et de l'accélération La Nature en Action est sans aucun doute une publication marquante Il s'agit en effet d'un changement de paradigme la Kuhn dans notre compréhension tant de l'univers que de la vie et de son évolution
