Geospatial Technologies for Integrated Water

Resources Management Bhagwan B. Ghute,Pranaya Diwate,2024-07-16 This book examines water resources helps understand complexities in water management and explains the use of geospatial technology By 2050 the world will have nearly about 9.8 billion population and which is almost 2.5 to 3 billion added to the present population Only 3% of world water resources are available for human consumption Even some resources are polluted because of poor management Water management is important since it helps determine future irrigation prospects Management of water resources under set policies and regulations Water is a more valuable commodity and the world is facing acute water shortages because of drought which is attributed to climate change and overuse Many rivers are drying up polluted and encroached Now the challenge is whether future generations will have enough fresh water for living Geospatial Technology i.e Remote Sensing RS and GIS have gained considerable interest among earth and hydrological science communities for solving and understanding various complex issues and approaches towards water resources development and management Water can provide sustainability to any region Sustainability means that meet the needs of the present without compromising the ability of future generations to meet their own needs These are generally integrated to study a variety of natural resources and their characteristics Major advancements have been accomplished in integrating remote sensing and GIS and they complement each other RS is used for acquiring information for GIS Remote sensing and GIS integration provide information on the spatial variation extent and potential and limitations of natural resources which is essential for planning the strategy for sustainable development Most hydrological or geomorphological models are developed in a GIS framework and these are helpful for the planning and management of water and decision makers for sustainable development

Integrated Intraoperative Ocular Coherence Tomography for Pediatric Ocular Surgery ,2021-05-03 Integrated or microscope integrated intraoperative ocular coherence tomography i2OCT or mi OCT respectively has revolutionized real time augmentation of the surgical operating field While corneal and retinal specialists have immediately found uses for this technology others are beginning to use it to improve outcomes and flatten the learning curve This book presents the use of i2OCT in pediatric ocular surgery Case scenarios in pediatric retinal disease corneal lamellar keratoplasty and even pediatric cataract surgery are discussed More novel applications highlighted include its use to identify the levator muscle in oculoplastic surgery especially re operations and to assess the results of glaucoma drainage devices Identifying extraocular muscles in re operation for strabismus ensures minimal tissue disruption during surgery Complex pediatric cataract surgeries can be performed far more simply and effectively using integrated ocular coherence tomography technology This volume provides invaluable information to both early career and experienced pediatric ocular specialists as well as any researchers who are likely to encounter i2OCT or mi OCT technology in the future Simple Methods to Study Pedology and Edaphology of Indian Tropical Soils

D. K. Pal,2018-05-23 This book discusses how research efforts have established an organic link between pedology and edaphology of five pedogenetically important soil orders as Alfisols Mollisols Ultisols Vertisols and Inceptisols of tropical Indian environments The book highlights how this new knowledge was gained when research efforts were complemented by high resolution mineralogical micro morphological and age control tools This advancement in basic and fundamental knowledge on Indian tropical soils makes it possible to develop several index soil properties as simple methods to study their pedology and edaphology More than one third of the world s soils are tropical soils Thus the recent advances in developing simple and ingenuous methods to study pedology and edaphology of Indian tropical soils may also be adopted by both graduate students and young soil researchers to aid in the development of a national soil information system to enhance crop productivity and maintain soil health in the 21st century

Comprehensive Data Structures and Algorithms in Java S. K. Srivastava,Deepali Srivastava,2025-09-16
DESCRIPTION Data Structures and Algorithms is an important subject in any university curriculum for computer science stream It provides a great tool in the hands of software engineers and plays significant role in software design and

development It is also becoming a must have skill for many competitions and job interviews in software industry This book covers the topics useful for students and also for software developers working in industry The concepts are explained in step wise manner and illustrated with numerous figures text examples and immediate code samples which helps in better understanding of data structures and algorithms with their implementation There are exercises at the end of the chapters which helps students to explore more and build better foundation of subject The book has more than 500 illustrations code samples and problems Solutions for exercises are also available with programs Students can use it for self learning and developers can use this for providing efficient solutions for their day to day development problems After completion of this book students will have good understanding of Data Structures and Algorithms concepts and implementation Software engineers will be able to provide better solutions with appropriate data structures and efficient algorithms

WHAT YOU WILL LEARN

Fundamentals of data structures and algorithms
 Algorithms analysis
 Variety of data structures and algorithms useful for software design and development
 How to efficiently use different data structures and algorithms
 When and where to use appropriate data structures and algorithms
 Data structures and algorithms concepts with implementation
 Approach to solve problems using right data structures and algorithms

WHO THIS BOOK IS FOR

Students who want to self study data structures and algorithms for their university curriculum subject and to enter software industry
 It is also useful for software engineers who want to learn it to solve day to day problems with better software design and writing efficient code
