

Cambridge Lower Secondary Science Curriculum outline

Cambridge Lower Secondary offers a curriculum that schools can shape around how they want their students to learn. It develops learners who are confident, responsible, reflective, innovative and engaged. Cambridge Lower Secondary builds skills, knowledge and understanding in English, English as a Second Language, mathematics, science and Cambridge Global Perspectives™. It is for learners typically aged 11 to 14.

There is a curriculum framework for each Cambridge Lower Secondary subject. Each framework is organised into three stages corresponding to the first three years of secondary education. They reflect the teaching target for each year group and provide comprehensive learning objectives.

We organise the Cambridge Lower Secondary Science curriculum in four content areas or 'strands'. Each strand is further divided into 'sub-strands'.

Strand: Scientific enquiry

- Ideas and evidence.
- Plan investigative work.
- Obtain and present evidence.
- Consider evidence and approach.

Strand: Biology

- Plants.
- Humans as organisms.
- Cells and organisms.
- Living things in their environment.
- Variation and classification.

Strand: Chemistry

- States of matter.
- Material properties.
- Material changes.
- The Earth.

Strand: Physics

- Forces and motion.
- Energy.
- The Earth and beyond.
- Sound.
- Light.
- Magnetism.
- Electricity.

The Scientific enquiry objectives underpin Biology, Chemistry and Physics, which are focused on developing confidence and interest in scientific knowledge.

Environmental awareness and some history of science are also incorporated. The Cambridge Lower Secondary Science curriculum framework provides a solid foundation for further stages of education such as Cambridge IGCSE™.
