Fiscal Reforms in the Middle East Ehtisham Ahmad, Abdulrazaq Al Faris, 2010-01-01 This insightful book focuses on the role of fiscal policy in common markets especially in the context of the supranational constructs in the Gulf Cooperation Council comprising Saudi Arabia Kuwait Bahrain Qatar the United Arab Emirates and Oman It draws on the experience of the EU and the importance of VAT and reflects on the other main common market in Central America Although oil windfalls have opened a window of opportunity for the Gulf States at the same time they have created numerous problems In particular the uncertainty associated with periods of boom and bust in the oil market has made the formulation and implementation of sound fiscal policies a formidable task In this study the distinguished authors present the background to current fiscal reforms and address the critical challenges facing the Gulf States including the choice between consumption and saving or current needs and future requirements intra generational equity issues the pro cyclical nature of fiscal policy fiscal sustainability and the prudent management of revenues from finite oil reserves They examine the case for VAT to substantially replace customs duties a significant source of non oil revenue which would be lost as a result of free trade agreements between the GCC and key trading partners They also demonstrate how an agreed design for VAT would assist in furthering economic integration and enhance trade and exports If properly sequenced VAT would have a negligible impact on both inflation and the poor and would be progressive in relation to the customs duties replaced This highly topical book will be of great interest to academics specializing in public sector economics and public finance and to national and international policymakers involved in fiscal reform

[Canadian Books in Print](#) ,1999 [Inequality in Canada](#) Eric W. Sager,2021-01-20 In *Inequality in Canada* Eric Sager considers one of the defining but hardest to define ideas of our era and traces its different meanings and contexts across the nineteenth and twentieth centuries Sager shows how the idea of inequality arose in the long evolution in Britain and the United States from classical economics to the emerging welfare economics of the twentieth century Within this transatlantic frame inequality took a distinct form in Canada different iterations of the idea appear in Protestant critiques of wealth labour movements farmer progressive politics the social gospel social Catholicism in Quebec English Canadian political economy and political and intellectual justifications of the social security state A tradition of idealist thought persisted in the twentieth century sustaining the idea of inequality despite deep silences among Canadian economists Sager argues that inequality goes beyond the distribution of income and wealth it is the idea that there are wide gaps between rich and poor that the gaps are both an economic problem and a social injustice and that when inequality appears it is as a problem that can be either eliminated or

reduced It is precisely because inequality appears in different contexts and because it changes Sager reasons that we can begin to perceive the contours and cleavages of inequality in our time In our century a political solution to inequality may rest on the recovery of an ethical ideal and egalitarian politics that have long preoccupied the history of Canadian thought

Thomas Allan McIntosh,Bonnie Jeffery,Nazeem Muhajarine,2010 What too few people realize is that as Andre Picard writes in his Foreword to *Redistributing Health* social justice or lack thereof has a greater impact on the health of the population than the human genome lifestyle choice and medical treatment The truth is that things like poverty social exclusion lack of meaningful employment and lack of access to education or good housing contribute significantly to ill health in Canada and none of these will be remedied by doctors or hospitals or pill bottles
