Caring A Relational Approach To Ethics And Moral Education

Scherto Gill, Garrett Thomson

Caring A Relational Approach To Ethics And Moral Education:

Caring Nel Noddings, 2013-09-14 With numerous examples to supplement her rich theoretical discussion Nel Noddings builds a compelling philosophical argument for an ethics based on natural caring as in the care of a mother for her child In *Caring* now updated with a new preface and afterword reflecting on the ongoing relevance of the subject matter the author provides a wide ranging consideration of whether organizations which operate at a remove from the caring relationship can truly be called ethical She discusses the extent to which we may truly care for plants animals or ideas Finally she proposes a realignment of education to encourage and reward not just rationality and trained intelligence but also enhanced sensitivity in moral matters *Caring*, 2000 *The Educator and The Ordinary* Elizabeth O'Brien, 2023-08-14 This book creates a unique discursive environment to consider how initial teacher education can support student teachers in practical and personal senses in what they can do and who they are What is it to care To develop our voice To educate in beautifully risky ways Engaging with the philosophy of Stanley Cavell Gert Biesta and Nel Noddings central capabilities of the educator are suggested Acknowledgement Autobiography Imagination Interruption Attention and Uncertainty culminating in the essential unifying capability of *The Ordinary* underpinned by Complexity and Hope This book will appeal to those interested and engaged in initial teacher education professional development and support from early years to higher education and practicing educators It aims to enrich theoretical as well as practical discussion to influence how we live how we think and how we treat each other *The Legacy and Limits of Vatican II in an Age of Crisis* Catherine E. Clifford, Kristin M. Colberg, Massimo Faggioli, Edward P. Hahnenberg, 2025-04-15 A renewed approach to the critical study of the event and documents of Vatican II necessary for responding to the challenges facing today's church Packed with new insights from some of today's most highly regarded voices on the Second Vatican Council *The Legacy and Limits of Vatican II in an Age of Crisis* enacts the living tradition of the church by proposing a richer history to be told sixty years from its celebration and a broader theology to inspire our work today Vatican II did not anticipate our contemporary challenges nor do its documents provide specific guidelines or step by step instructions for addressing them But that does not make the council irrelevant As a touchstone of the church's magisterial tradition the Second Vatican Council remains foundational for the life and mission of the Catholic Church today However like any monument of the tradition the council requires ongoing investigation critical analysis and constant reconsideration from a diversity of contemporary perspectives if it is going to contribute to the living tradition of the church Through historical and theological lenses the contributors aim to rediscover forgotten voices and overlooked moments of Vatican II that may have something even more important to say today Each chapter promises to surprise enlighten inspire and teach in fresh and unexpected ways The contributors offer readers striking insights on the council's teaching related to the sexual abuse crisis antiracism politics the Synod on Synodality and much more By reexamining the teaching of Vatican II from the perspective of our present ecclesial crisis readers will have a better

understanding of how its legacy and limits affect the ongoing reform of the church in a much changed theological ecclesial and social landscape

Ethical Education Scherto Gill, Garrett Thomson, 2020-07-16 Ethical education should help students become more sensitive to the perspectives and experiences of others However the field is dominated by the teaching of moral values as a subject matter or by the fostering of character traits in students or by moral reasoning This book proposes an alternative to these limited moralistic approaches It places human relationships at the core of ethical education in its understanding of both ethics and education With contributions from renowned international scholars this approach is laid out in three parts Part One develops the underlying theory of ethics and education Part Two focuses on the relevant pedagogical principles and Part Three provides illustrations of emergent innovative ethical educational practices in worldwide schools Against a backdrop of divisiveness and apathy the innovative practices described in this book show how a new vision for ethical education might be centred around caring for students well being

Pedagogies of Kindness and Respect Paul Lee Thomas, 2015 Pedagogies of Kindness and Respect presents a wide variety of concepts from scholars and practitioners who discuss pedagogies of kindness an alternative to the no excuses ideology now dominating the way that

children are raised and educated in the U S today The fields of education and especially early childhood education include some histories and perspectives that treat those who are younger with kindness and respect This book demonstrates an informed awareness of this history and the ways that old and new ideas can counter current conditions that are harmful to both those who are younger and those who are older while avoiding the reconstitution of the romantic innocent child who needs to be saved by more advanced adults Two interpretations of the upbringing of children are investigated and challenged one suggesting that the poor do not know how to raise their children and thus need help while the other looks at those who are privileged and therefore know how to nurture their young These opposing views have been discussed and problematized for more than thirty years Pedagogies of Kindness and Respect investigates the issue of why this circumstance has continued and even worsened today

The Maternal Factor Nel Noddings, 2010-04-24 In this provocative new book renowned educator and philosopher Nel Noddings extends her influential work on the ethics of care toward a compelling objective global peace and justice She asks If we celebrate the success of women becoming more like men in professional life should we not simultaneously hope that men become more like women in caring for others rejecting violence and valuing the work of caring both publicly and personally Drawing on current work on evolution and bringing concrete examples from women s lived experience to make a strong case for her position Noddings answers this question by locating one source of morality in maternal instinct She traces the development of the maternal instinct to natural caring and ethical caring offering a preliminary sketch of what a care driven concept of justice might look like Finally to advance the cause of caring peace and women s advancement Noddings urges women to abandon institutional patriarchal religion and to seek their own paths to spirituality
