Murderabilia Harold Schechter,2023-09-26 From veteran true crime master Harold Schechter comes a unique look into

the history of crime told through the dark objects left behind The false teeth of a female serial killer from 1908 the cut and paste confession of the Black Dahlia killer the newly cracked cipher of the Zodiac killer the shotgun used in the Clutter family murders which were made famous by Truman Capote s true crime classic In Cold Blood these are more than simple artifacts that once belonged to notorious murderers They are objets of fascination to the legion of true crime obsessives around the world And not merely for fleeting dark thrills but because they represent a way to better understand those who we typically label monsters in lieu of learning how they actually became one In Murderabilia veteran true crime writer Harold Schechter presents 100 murder related artifacts spanning two centuries 1808 2014 with accompanying stories of various lengths A visual and literary journey it presents a history unlike any previously told in the true crime genre one that speaks to the dark fascination of true crime fans while also presenting a larger historical timeline of how and why we continue to be captivated by the most sensational crimes and killers among us An End To Murder Colin Wilson,Damon Wilson,2015-09-24

Creatively and intellectually there is no other species that has ever come close to equalling humanity s achievements but nor is any other species as suicidally prone to internecine conflict We are the only species on the planet whose ingrained habit of conflict constitutes the chief threat to our own survival Human history can be seen as a catalogue of cold hearted murders mindless blood feuds appalling massacres and devastating wars but with developments in forensic science and modern psychology and with raised education levels throughout the world might it soon be possible to reign in humanity s homicidal habits Falling violent crime statistics in every part of the world seem to indicate that something along those lines might indeed be happening Colin and Damon Wilson who between them have been covering the field of criminology for over fifty years offer an analysis of the overall spectrum of human violence They consider whether human beings are in reality as cruel and violent as is generally believed and they explore the possibility that humankind is on the verge of a fundamental change that we are about to become truly civilised As well as offering an overview of violence throughout our history from the first hominids to the twenty first century touching on key moments of change and also indicating where things have not changed since the Stone Age they explore the latest psychological forensic and social attempts to understand and curb modern human violence To begin with they examine questions such as Were the first humans cannibalistic Did the birth of civilisation also lead to the invention of war and slavery Priests and kings brought social stability but were they also the instigators of the first mass murders Is it in fact wealth that is the ultimate weapon They look at slavery and ancient Roman sadism but also the possibility that our own distaste for pain and cruelty is no more than a social construct They show how the humanitarian ideas of the great religious innovators all too quickly became distorted by organised religious structures The book ranges widely from fifteenth century Baron Gilles de Rais Bluebeard the first known and possibly most prolific serial killer in history to Victorian domestic murder and the invention of psychiatry and Sherlock Holmes and the invention of forensic science from the fifteenth century Taiping Rebellion in China in which up to 36 million died to the First and Second World Wars and more

recent genocides and instances of ethnic cleansing and contemporary terrorism They conclude by assessing the very real possibility that the internet and the greater freedom of information it has brought is leading gradually to a profoundly more civilised world than at any time in the past

The World of Meaning Christopher Zurcher, 2024-05-22 The meaning of life is something that has puzzled humanity for centuries and continues to inspire contemplation and discussion Near the end of the nineteenth century German philosopher Friedrich Nietzsche predicted that the West's obsession with viewing the world through a scientific lens would eventually lead to the death of God the realization that our religious traditions would not hold up under scientific scrutiny and therefore would become unbelievable This in turn Nietzsche believed would lead to nihilism and a loss of purpose After all without the existence of a transcendent reality what is the point Why continue living Or better yet if there is no God why not do whatever we want whenever we want In a million years what will it matter The World of Meaning attempts to answer these questions by exploring the claim that humans essentially live in two worlds the scientific world of objects and the conceptual world of meaning and although the objective world may be easier to measure scientifically it appears that the world of meaning is our primary reality Through the study of philosophy science and mythology The World of Meaning attempts to prove the existence of this conceptual world and provide us with a blueprint for rediscovering the transcendent as well as the purpose of our lives
