This unique annotated bibliography lists nearly 300 books on the art of blacksmithing. It is divided into four parts: Practical Blacksmithing, Specialized Areas of Blacksmithing, Historical Background of the Profession and Products of the Forge. Part 1 deals with the technical side of blacksmithing: the texts, manuals, and courses aimed at teaching the basic processes. It includes reference books on the materials of blacksmithing and on metallurgy. Part 2 presents the more specialized and advanced processes of blacksmithing, including ornamental ironwork, farm smithing, industrial forging, and bladesmithing. It also includes materials related to pattern welded Damascus steel. The listings in part 3 deal with blacksmithing as a literary and historical subject. The primary focus of these books is on the traditions, lore, and descriptions of the trade. In these books, the processes, tools, and products are of only secondary importance. Part 4 lists books that treat the products of the forge, a wide-ranging area that covers everything from tools and utensils to architectural works. A special feature of this section is a chapter emphasizing individual smiths and their works. The book also contains two indexes: one an alphabetical listing by

author and one an alphabetical listing by title **Pure and Applied Science Books, 1876-1982** ,1982 Over 220 000 entries representing some 56 000 Library of Congress subject headings Covers all disciplines of science and technology e g engineering agriculture and domestic arts Also contains at least 5000 titles published before 1876 Has many applications in libraries information centers and other organizations concerned with scientific and technological literature Subject index contains main listing of entries Each entry gives cataloging as prepared by the Library of Congress Author title indexes
