how the Theory of Change framework can be effectively employed in a wide range of social interventions Presenting its potential to support strategy and strategic thinking this book offers an entry point to understanding how Theory of Change can be applied beyond the typical domain of aid projects Making Design Theory Johan Redstrom,2017-09-01 A new approach to theory development for practice driven research proposing that theory is something made in and through design Tendencies toward academization of traditionally practice based fields have forced design to articulate itself as an academic discipline in theoretical terms In this book Johan Redstr m offers a new approach to theory development in design research one that is driven by practice experimentation and making Redstr m does not theorize from the outside but explores the idea that just as design research engages in the making of many different kinds of things theory might well be one of those things it is making Redstr m proposes that we consider theory not as stable and constant but as something unfolding something acted as much as articulated inherently fluid and transitional Redstr m describes three ways in which theory in particular formulating basic definitions is made through design the use of combinations of fluid terms to articulate issues the definition of more complex concepts through practice and combining sets of definitions made through design into programs These are the building blocks for creating conceptual structures to support design Design seems to thrive on the complexities arising from dichotomies form and function freedom and method art and science With his idea of transitional theory Redstr m departs from the traditional academic imperative to pick a side theory or practice art or science Doing so he opens up something like a design space for theory development within design research Multidisciplinary Aspects of Design Francesca Zanella,Giampiero Bosoni,Elisabetta Di Stefano,Gioia Laura Iannilli,Giovanni Matteucci,Rita Messori,Raffaella Trocchianesi,2023-12-30 This open access book gathers the contributions from the Design OPEN International Conference held in Parma Italy in May 2022 The conference explored the multidisciplinary aspects of design starting from its dimensions objects design as focused on the object on its functional and symbolic dimension and at the same time on the object as a tool for representing cultures processes the designer s self reflective moment which is focused on the analysis and on the definition of processes in various contexts spanning innovation social engagement reflection on emergencies or forecasting experiences design as a theoretical and practical strategy aimed at facilitating experiential interactions among people people and objects or environments and narratives making history representing through different media archiving narrating and exhibiting design The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists **Advances in Information and Communication** Kohei Arai,Rahul Bhatia,2019-02-01 This book presents a remarkable collection of chapters that cover a wide range of topics in the areas of information and communication technologies and their real world applications It gathers the Proceedings of the Future of Information and Communication Conference 2019 FICC 2019 held in San Francisco USA from March 14 to 15 2019 The conference attracted a total of 462

submissions from pioneering researchers scientists industrial engineers and students from all around the world Following a double blind peer review process 160 submissions including 15 poster papers were ultimately selected for inclusion in these proceedings The papers highlight relevant trends in and the latest research on Communication Data Science Ambient Intelligence Networking Computing Security and the Internet of Things Further they address all aspects of Information Science and communication technologies from classical to intelligent and both the theory and applications of the latest technologies and methodologies Gathering chapters that discuss state of the art intelligent methods and techniques for solving real world problems along with future research directions the book represents both an interesting read and a valuable asset
