Wireless Multimedia Sensor Networks on Reconfigurable Hardware Li-minn Ang,Kah Phooi Seng,Li Wern Chew, Lee Seng Yeong,Wai Chong Chia,2013-11-19 Traditional wireless sensor networks WSNs capture scalar data such as temperature vibration pressure or humidity Motivated by the success of WSNs and also with the emergence of new technology in the form of low cost image sensors researchers have proposed combining image and audio sensors with WSNs to form wireless multimedia sensor networks WMSNs This introduces practical and research challenges because multimedia sensors particularly image sensors generate huge amounts of data to be processed and distributed within the network while sensor nodes have restricted battery power and hardware resources This book describes how reconfigurable hardware technologies such as field programmable gate arrays FPGAs offer cost effective flexible platforms for implementing WMSNs with a main focus on developing efficient algorithms and architectures for information reduction including event detection event compression and multicamera processing for hardware implementations The authors include a comprehensive review of wireless multimedia sensor networks a complete specification of a very low complexity low memory FPGA WMSN node processor and several case studies that illustrate information reduction algorithms for visual event compression detection and fusion The book will be of interest to academic researchers R D engineers and computer science and engineering graduate students engaged with signal and video processing computer vision embedded systems and sensor networks

Digital Technology and Justice Tania Sourdin,Jacqueline Meredith,Bin Li,2020-11-24 Justice apps mobile and web based programmes that can assist individuals with legal tasks are being produced improved and accessed at an unprecedented rate These technologies have the potential to reshape the justice system improve access to justice and demystify legal institutions Using artificial intelligence techniques apps can even facilitate the resolution of common legal disputes However these

opportunities must be assessed in light of the many challenges associated with app use in the justice sector. These include the digital divide and other accessibility issues, the ethical challenges raised by the dehumanisation of legal processes and various privacy, security and confidentiality risks. Surveying the landscape of this emergent industry, this book explores the objectives, opportunities and challenges presented by apps across all areas of the justice sector. Detailed consideration is also given to the use of justice apps in specific legal contexts including the family law and criminal law sectors. The first book to engage with justice apps, this book will appeal to a wide range of legal scholars, students, practitioners and policy makers.

The Preservation Management Handbook Ross Harvey, Martha R. Mahard, 2014-04-10. Cultural heritage professionals, museum curators, museum professionals, archivists and librarians work with their specialized knowledge to prioritize the needs of their collections. Preservation managers draw on experts in climate control, fire safety, pest management and more in developing the large overview of a collection and its needs. And all the special materials within the collections have their experts too. Here in one volume is a wide range of topic-specific expertise that comprises both an enduring text for preservation students as well as an essential one-stop reference for cultural heritage professionals, particularly those in small to medium-sized organizations where resources are limited and professional help is not always at hand. The editors introduce the reader to the essential tools and principles of a preservation management program in the twenty-first century, addressing the realities of diverse collections and materials and embracing the challenges of working with both analog and digital collections. The sections on planning and managing a preservation program contain the basic starting point for any kind of collection, regardless of size and content. Written with the small collection in mind, the principles are nevertheless scalable and widely applicable.

Bioprocess Engineering and Technology Biswanath Bhunia, Navneet Joshi, Muthusivaramapandian, Muhuraja, 2025-11-26. This book deals with the practical aspects in bioprocess plant design, project engineering, process economics, IPR and biobusiness prospects related to bioprocess engineering. Bioprocess Engineering and Technology: Downstream Process and Plant Design also describes how productivity, efficiency and safety of process plants hinge on proper equipment functionality. The authors explain the various downstream processes that can be employed for separation and purification of desired products. The editors provide the protocols for

plant design and process design along with the project requirements needed in planning and commissioning a bioprocessing plant The book also emphasizes the importance of biosafety regulations IPR project engineering and bioprocess economics for the development of entrepreneurship within the industry Finally the editors also include various case studies that describe potential biobusiness options within bioprocess engineering The text is wide in scope and highlights the multidimensional approach for developing expertise in bioprocessing and would be a useful resource for students studying bioprocess engineering as well as entrepreneurs and managers in the business

philosophy of technology **Smart Village Technology** Srikanta Patnaik, Siddhartha Sen, Magdi S. Mahmoud, 2020-02-07

This book offers a transdisciplinary perspective on the concept of smart villages. Written by an authoritative group of scholars, it discusses various aspects that are essential to fostering the development of successful smart villages. Presenting cutting edge technologies such as big data and the Internet of Things and showing how they have been successfully applied to promote rural development, it also addresses important policy and sustainability issues. As such, this book offers a timely snapshot of the state of the art in smart village research and practice.

Forks in the Digital Road Scott J. Shackelford, Scott O. Bradner, 2024. Fifty years ago a UCLA computer science professor and his student sent the first electronic message over a network called ARPANET, a predecessor to the Internet. The intended message, the word "login", was truncated in a computer crash to "lo". Digital infrastructure has made significant advances since then, but key decision points in the history of the Internet continue to reverberate today and have done much to shape not only cyberspace but the twenty-first century. In *Forks in the Digital Road*, Scott J. Shackelford and Scott O. Bradner revisit the key decision points in the history of cybersecurity and Internet governance, revealing the alternative paths or forks that existed at the time and addressing the question of what if. What if encryption was built into the Internet's architecture from the beginning? What if Section 230, which shields Internet platforms from civil liability, had taken a different form? What if Cerf and Kahn had structured TCP/IP in another way? What if Tim Berners-Lee had taken the advice of counsel and patented the World Wide Web? And what if the US government had not gotten directly involved with Internet governance in 1998 or elected not to help launch a new era of cyber conflict in 2006? Shackelford and Bradner answer these questions and many more. They explain how things might have been different if other paths had been followed and offer practical ideas to help build a new vision of cyberspace that is as secure, private, efficient, and fun as possible. At a time when the future of cyberspace has never been more in doubt, with the potential for a new Digital Cold War or even a splinternet having the potential to fracture cyberspace into a series of national level intranets in the wake of the war in Ukraine, the time is ripe to take both a look back and ahead.

History in the Digital Age Toni Weller, 2013. The digital age is affecting all aspects of historical study, but much of the existing literature about history in the digital age can be alienating to the traditional historian who does not necessarily value or wish to embrace digital resources. *History in the Digital Age* takes a more conceptual look at how the digital age is affecting the field of history for both scholars and students. The printed copy, the traditional archive, and analogue research remain key constituent parts for most historians, and for many will remain precious and esteemed over digital copies, but there is a real need for historians and students of history to seriously consider some of the conceptual and methodological challenges facing the field of historical enquiry as we enter the twenty-first century. Including international contributors from a variety of disciplines, History, English, Information Studies, and Archivists, this book does not seek either to applaud or condemn digital technologies but takes a more conceptual view of how the field of history is being changed by the digital age. Essential reading for all historians.

National Association of Broadcasters Engineering Handbook Garrison Cavell, 2017-07-28 The NAB Engineering Handbook is the definitive resource for broadcast engineers. It provides in-depth information about each aspect of the broadcast chain from audio and video contribution through an entire broadcast facility all the way to the antenna. New topics include Ultra High Definition Television, Internet Radio Interfacing and Streaming, ATSC 3.0 Digital Audio Compression Techniques, Digital Television Audio Loudness Management and Video Format and Standards Conversion. Important updates have been made to incumbent topics such as AM Shortwave FM and Television Transmitting Systems, Studio Lighting, Cameras and Principles of Acoustics. The big picture comprehensive nature of the NAB Engineering Handbook will appeal to all broadcast engineers everyone from broadcast chief engineers who need expanded knowledge of all the specialized areas they encounter in the field to technologists in specialized fields like IT and RF who are interested in learning about unfamiliar topics. Chapters are written to be accessible and easy to understand by all levels of engineers and technicians. A wide range of related topics that engineers and technical managers need to understand are covered including broadcast documentation, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management and engineering management.
