Alasdair McAndrew,Jung Hua Wang,Chun Shun Tseng,2010 Fundamentals of Digital Image Processing Chris Solomon,Toby Breckon,2011-07-05 This is an introductory to intermediate level text on the science of image processing which employs the Matlab programming language to illustrate some of the elementary key concepts in modern image processing and pattern recognition The approach taken is essentially practical and the book offers a framework within which the concepts can be understood by a series of well chosen examples exercises and computer experiments drawing on specific examples from within science medicine and engineering Clearly divided into eleven distinct chapters the book begins with a fast start introduction to image processing to enhance the accessibility of later topics Subsequent chapters offer increasingly advanced discussion of topics involving more challenging concepts with the final chapter looking at the application of automated image classification with Matlab examples Matlab is frequently used in the book as a tool for demonstrations conducting experiments and for solving problems as it is both ideally suited to this role and is widely available Prior experience of Matlab is not required and those without access to Matlab can still benefit from the independent presentation of topics and numerous examples Features a companion website www.wiley.com/go/solomon_fundamentals containing a Matlab fast start primer further exercises examples instructor resources and accessibility to all files corresponding to the examples and exercises within the book itself Includes numerous examples graded exercises and computer experiments to support both students and instructors alike A Course on Digital Image Processing with MATLAB P. K.

Thiruvikraman,2019 Concentrating on the principles and techniques of image processing this book provides an in depth presentation of key topics including many techniques not included in introductory texts Practical implementation of the various image processing algorithms is an important step in learning the subject and computer packages such as MATLAB facilitate this without the need to learn more complex programming languages Whilst two chapters are devoted to the MATLAB programming environment and the image processing toolbox the use of image processing algorithms using MATLAB is emphasised throughout the book and every chapter is accompanied by a collection of exercises and programming assignments Including coverage of colour and video image processing as well as object recognition the book is augmented with supplementary MATLAB code and hints and solutions to problems are also provided Digital Image Fundamentals in MATLAB Mohammad Nuruzzaman,2005 The book is mainly concerned with the fundamental Digital Image Processing DIP

problems much found in the DIP textbooks Emphasis has been given to the subjective implementation on the DIP problems while working in MATLAB Starting from simplistic example without undue neglect of mathematical intricacies and making the reader able to tackle a practical DIP problem are the salient features of the text However the notable features of the text are as follows A step by step guide for the Digital Image Processing undergraduate and graduate students while using MATLAB as their working platform Introduces modular image examples so that the reader can grasp the concept quickly and manipulate the practical images very easily Image processing engineers teachers researchers and scientists willing to work in MATLAB may benefit from the text Made easy approach and clear presentation style comfort the average reader to go through the Digital Image Processing know how immediately Minute implementational descriptions are taken care of considering adequate image examples Suited to individual or classroom practice Ten chapters in the text narrate the following 1 Introduction to MATLAB 2 Digital Image Fundamentals 3 Digital Images In Spatial Domain 4 Digital Image Transforms 5 Digital Image Filtering 6 Digital Image Properties and Edges 7 Image Degradation and Restoration 8 Morphological Image Processing 9 Miscellaneous Image Processing 10 Programming Issues Digital Image Processing and Analysis Scott E.
