Rubric Statement	Thesis Statement
Discoveries can encompass the experience of discovering something for the first time or rediscovering something that has been lost, forgotten or concealed.	When individuals search for a new experience, they may uncover ideas, incidents, or objects that were thought to be lost, but also discover new and unexpected concepts and understanding. Individuals may be led to a discovery through the actions of others or through a catalyst. Experience may enable an individual to review the past or see it in a new light. New experiences and risk-taking may act as a catalyst for self-discovery. An individual may be predisposed to make a discovery if they have innate curiosity
Discoveries can be sudden and expected, or they can emerge from a process of deliberate and careful planning evoked by curiosity, necessity or wonder.	When an individual's memory has been evoked by curiosity, an individual can gain further clarity and fulfillment about the past and their identity. An individual's interest may be piqued, causing the world to be viewed through fresh eyes. Individuals may be lead to new perspectives on the world through the careful construction of reality through another individual. Discoveries may be the result of arduous processes of investigation and research
Discoveries can be fresh and intensely meaningful in ways that may be emotional, creative, intellectual, physical and spiritual.	An individual may be lost but may ironically find themselves/discover their identity or essence of themselves.

Discovering The Tempest Discovery Rubric:

Colonial Failure and Theatrical Form in Early Modern England Caro Pirri, 2025-09-30 Colonial Failure and Theatrical Form in Early Modern England shows how early modern English dramatists preserved and instrumentalized the early history of England's failed conquests of the Americas in the formal techniques they used to stage fictional worlds. Scholars have long noted that early English drama was interested in representing colonial ventures largely emphasizing references, themes, or settings as evidence for this engagement. Through an analysis of the technical features of early English commercial drama, this book establishes that popular Renaissance dramatists such as William Shakespeare, Christopher Marlowe, Ben Jonson, and Thomas Middleton were also sourcing new theatrical tools from contemporary records of colonial failure, recognizing in them a set of techniques for representing geographic disorientation, strandedness, and confusion. During a time when theater's foundational technologies, prop, person, line, and scene, were themselves undergoing a formal transformation, dramatists turned to the narrative and spatial incoherence of these settler accounts, their uncoupling of the link between representation (what is shown) and presentation (how it is shown) as a resource for highlighting the interpretive challenges these changing conventions posed. By demonstrating that popular drama's development was deeply imprinted by the history and textual legacy of England's colonial conquests, not only as setting or theme but as form, this book radically expands the archive of plays that we could call New World dramas, allowing plays that don't appear to be about colonialism to be understood as borrowing from the rhetorical or narrative structure of colonial texts. *Stages of Unsettlement* proves that the expansion of the English stage into new settings cannot be understood apart from the colonial strategies for representing place that informed these representations.

How Genes Influence Behavior Jonathan Flint, Ralph J. Greenspan, Kenneth S. Kendler, 2020 *How Genes Influence Behavior* 2e takes a personal and lively approach to the study of behavioral genetics, providing an up-to-date and accessible introduction to a variety of approaches and their application to a wide range of disorders and modeling a critical approach to both methods and results. This second edition includes additional biology content to help students understand the biological foundations of the field while maintaining an appropriate focus on the main issues of relevance to psychology students. Updates coverage of genomic technologies and their applications and covers a wider range of disorders, including autism spectrum disorder, eating disorders, and intellectual disability. A new final chapter guides students through a range of quantitative approaches using worked examples that relate directly to cases and examples used earlier in the text and addresses current issues arising from debates around reproducibility. The online resources that accompany this book include: For students: Multiple choice questions for students to check their threshold knowledge; Data sets for students to manipulate so that they can apply what they have learned. For lecturers: Figures and tables from the book ready to download.
