Cycling Peter Cox,2019-03-15 Cycling A

Sociology of Mobility explores cycling as a sociological phenomenon Drawing on extensive ethnographic fieldwork it considers the interaction of materials, competencies and meanings that comprise a variety of cycling practices What might appear at first to be self-evident actions are shown to be constructed through the interplay of numerous social and political forces Using a theoretical framework from mobilities studies its central themes respond to the question of what it is about cycling that provokes so much interest and passion both positive and negative Individual chapters consider how cycling has appeared as theme and illustration in social theory as well as the legacies of these theorizations The book expands on the image of cycling practices as the product of an assemblage of technology, rider and environment Riding spaces as material technologies are found to be as important as the machinery of the cycle and a distinction is made between routes and rides to help interpret aspects of journey making Ideas of both affordance and script are used to explore how elements interact in performance to create sensory and experiential scapes Consideration is also given to the changing identities of cycling practices in historical and geographical perspective The book adds to existing research by extending the theorization of cycling mobilities It engages with both current and past debates on the place of cycling in mobility systems and the problems of researching, analyzing and communicating ephemeral mobile experiences *Bicycling Infrastructure: Design for Indian Cities and Emerging Economies* Debapratim Pandit, Deepa Sharma, 2022-04-26 The book focuses on specific infrastructural solutions for bicycling for Indian cities and other emerging economies It explores the current state of bicycling infrastructure in Indian cities and proposes standard and custom designs, guidelines, 2D and 3D illustrations, technical drawings as well as relevant discussions and explanations for the choice of right infrastructural solutions according to site constraints This volume will be of great interest to those in academia and industry dedicated to a vision of creating inclusive streets in Indian cities and emerging economies to making the street safe and comfortable for bicyclists ICT for Transport Nikolas Thomopoulos, Moshe Givoni, the late Piet Rietveld, 2015-05-29 Information and Communication Technologies ICT are rapidly evolving and taking centre stage in everyday life in the 21st century alongside the increasing importance and value of information This is particularly evident in the transport sector where Cycling Futures Regine Gerike, John Parkin, 2016-03-09 Pointing the way to the future of research and development in relation to cycling as a mode of transport this book investigates some of the significant recent developments in the technology provision for and take up of cycling in various parts of the world Tensions at the heart of the nature of cycling remain on the one hand cycling is frequently viewed as being a risky activity while on the other hand it is seen as being a way of allowing populations to live healthier lives Reviewing this dichotomy the authors in this book consider the ways that cycling is planned and promoted This is done partly in relation to these issues of risk and health but also from the broader perspective of behavioural response to the changing nature of cycling A section on methodologies is also included which outlines the current state of the art and points a way to future research *Planning After Petroleum* Jago Dodson, Neil Sipe, Anitra Nelson, 2016-10-04 The past decade has been one

of the most volatile periods in global petroleum markets in living memory and future oil supply security and price levels remain highly uncertain This poses many questions for the professional activities of planners and urbanists because contemporary cities are highly dependent on petroleum as a transport fuel How will oil dependent cities respond and adapt to the changing pattern of petroleum supplies What key strategies should planners and policy makers implement in petroleum vulnerable cities to address the challenges of moving beyond oil How might a shift away from petroleum provide opportunities to improve or remake cities for the economic social and environmental imperatives of twenty first century sustainability Such questions are the focus of contributors to this book with perspectives ranging across the planning challenge overarching petroleum futures governance transition and climate change questions the role of various urban transport nodes and household responses ways of measuring oil vulnerability and the effects on telecommunications ports and other urban infrastructure This comprehensive volume with contributions from and focusing on cities in Australia the UK the US France Germany the Netherlands and South Korea provides key insights to enable cities to plan for the age beyond petroleum
