User-Centered Interaction Design Patterns for Interactive Digital Television Applications Tibor Kunert,2009-06-12 Technology is meant to make life easier and to raise its quality Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology Even so technology may change quickly and people and their habits change slowly With the aim of supporting user acceptance of iTV the focus of this book is on the usability of iTV applications A method for developing interaction design patterns especially for new technologies is presented for the first time The main characteristics covered in this new approach are systematic identification of recurrent design problems usability as a quality criterion for design solutions integration of designers into the pattern development process including identification of designers needs and iterative evaluation and optimisation of patterns to encourage designers to accept and use them usability testing to identify proven design solutions and their trade offs presentation of specific design guidelines C++ Gems Stanley B. Lippman,1998 Presents the pinnacle of writing on C by renowned experts in the field and is a must read for today s C programmer

Designing with Objects Avinash C. Kak,2015-02-09 Here is a book that takes the sting out of learning object oriented design patterns Using vignettes from the fictional world of Harry Potter author Avinash C Kak provides a refreshing alternative to the typically abstract and dry object oriented design literature Designing with Objects is unique It explains design patterns using the short story medium instead of sterile examples It is the third volume in a trilogy by Avinash C Kak following Programming with Objects Wiley 2003 and Scripting with Objects Wiley 2008 Designing with Objects confronts how difficult it is for students to learn complex patterns based on conventional scenarios that they may not be able to relate to In contrast it shows that stories from the fictional world of Harry Potter provide highly relatable and engaging models After explaining core notions in a pattern and its typical use in real world applications each chapter shows how a pattern can be mapped to a Harry Potter story The next step is an explanation of the pattern through its Java implementation The following patterns appear in three sections Abstract Factory Builder Factory Method Prototype and Singleton Adapter Bridge Composite Decorator Facade Flyweight and Proxy and the Chain of Responsibility Command Interpreter Iterator Mediator Memento Observer State Strategy Template Method and Visitor For readers use Java code for each pattern is included in the book s companion website All code examples in the book are available for download on a companion website with resources for readers and instructors A refreshing alternative to the

abstract and dry explanations of the object oriented design patterns in much of the existing literature on the subject In 24 chapters Designing with Objects explains well known design patterns by relating them to stories from the fictional Harry Potter series

Architectural Robotics Keith Evan Green,2016-02-12 How a built environment that is robotic and interactive becomes an apt home to our restless dynamic and increasingly digital society The relationship of humans to computers can no longer be represented as one person in a chair and one computer on a desk Today computing finds its way into our pockets our cars our appliances it is ubiquitous an inescapable part of our everyday lives Computing is even expanding beyond our devices sensors microcontrollers and actuators are increasingly embedded into the built environment In Architectural Robotics Keith Evan Green looks toward the next frontier in computing interactive partly intelligent meticulously designed physical environments Green examines how these architectural robotic systems will support and augment us at work school and home as we roam interconnect and age Green tells the stories of three projects from his research lab that exemplify the reconfigurable distributed and transfigurible environments of architectural robotics The Animated Work Environment is a robotic work environment of shape shifting physical space that responds dynamically to the working life of the people within it home is a suite of networked distributed robotic furnishings integrated into existing domestic and healthcare environments and LIT ROOM offers a simulated environment in which the physical space of a room merges with the imaginary space of a book becoming a portal to elsewhere How far beyond workstations furniture and rooms can the environments of architectural robotics stretch Green imagines scaled up neighborhoods villages and metropolises composed of physical bits digital bytes living things and their hybrids Not global but local architectural robotics grounds computing in a capacious cyber physical home
