Design of Small Electrical Machines Essam S. Hamdi, 1994-11-15 Designing electrical machines requires multi disciplinary skills Engineers must not only be expert in electromagnetic design but also in selecting materials and choosing production techniques Employing a range of examples the author covers various design procedures from specification to performance prediction Featuring Selection and specification of components and materials Production techniques Focus on both the electrical and mechanical construction aspects Introduction to CAD Detailed exploration of thermal design Unified approach to permanent magnet and wound field d c motor design Design of 50 Hz and 400 Hz induction motors Typical designs This timely book highlights the latest advances in design techniques and materials By presenting a self contained and unified treatment it will prove invaluable to both professional engineers and senior students

Design of Small Electrical Machines E. S. Hamdi, 1994 **Development of Brushless Self-excited and Self-regulated Synchronous Generating System for Wind and Hydro Generators** Izzat, Likaa Fahmi Ahmed, 2013-01-01

In this work a developed model of brushless synchronous generator of wound rotor type is designed analyzed by FEM practically applied and investigated A comparison of results with conventional machines is also performed The presented machine can be applied for multi pole wind hydro generators or double poles diesel engine generators It is self excited by residual magnetism and a connected capacitor It is also self regulated by making use of fluctuations at load or limited speed changes The generated voltage may last at extended speed range by arranging a generating system with variable capacitance By eliminating the permanent magnets or advanced manufacturing technology of rotor poles and without using extra rotating external DC exciters an efficient excitation field and an output of flat self compensated compound characteristic are obtained More the feature of damper windings is determined Concerning the fact of environmental diminishing of elements in materials of permanent magnets and D C Battery the presented novel machine is hence a good alternative and more economic from generators exist in the market Beside it is safer and highly recommended for power stability when connected to the grid
