Water Infrastructure for Sustainable Communities Xiaodi Hao, Vladimir Novotny, Valerie Nelson, 2010-07-31 A new model for water management is emerging worldwide in response to water shortages polluted waterways climate change and loss of biodiversity Cities and towns are questioning the ecological and financial sustainability of big pipe water stormwater and sewer systems and are searching for lighter footprint more sustainable solutions Pilot projects are being built that use treat store and reuse water locally and that build distributed designs into restorative hydrology This book has been developed from the conference on Sustainable Water Infrastructure for Villages and Cities of the Future SWIF2009 held in November 2009 in Beijing China that brought together an international gathering of experts in urban water and drainage infrastructure landscape architecture economics environmental law citizen participation utility management green building and science and technology development Water Infrastructure for Sustainable Communities China and the World reveals how imaginative concepts are being developed and implemented to ensure that cities towns and villages and their water resources can become ecologically sustainable and provide clean water With both urban and rural waters as a focal point the links between water quality and hydrology landscape and the broader concepts of green cities villages and smart development are explored The book focuses on decentralized concepts of potable water stormwater and wastewater management that would provide clean water It results in water management systems that would be resilient to extreme events such as excessive flows due to extreme meteorological events severe droughts and deteriorated water and

urban ecosystem quality A particular emphasis is placed on learning lessons from the many innovative projects being designed in China and other initiatives around the world The principal audience for the book is university faculty and students scientists in research institutes water professionals governmental organizations NGOs urban landscape architects and planners Visit the IWA WaterWiki to read and share material related to this title <http://www.iwaterwiki.org/xwiki/bin/view/Articles/WaterInfrastructureforSustainableCommunities> Edited by Professor Xiaodi Hao Beijing University of Civil Engineering and Architecture P R of China Professor Vladimir Novotny Northeastern University Boston USA and Dr Valerie Nelson Coalition for Alternative Wastewater Treatment MA USA

Conceptual Structural Design Olga Popovic Larsen, Andy Tyas, 2003 This book aims to bridge the gap between engineers and architects understanding of structural form Its intention is to inspire the development of innovative and viable structures It presents case studies where imaginative structural forms are in harmony with the architectural concept and at the same time present very efficient solutions to technical and structural problems

Water Ethics David Groenfeldt, 2019-02-21 Fully revised and updated this second edition of Water Ethics continues to consolidate water ethics as a key dimension of water related decisions The book introduces the idea that ethics are an intrinsic dimension of any water policy program or practice and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management Alongside updated references and the introduction of discussion questions and recommended further reading this new edition discusses in depth three significant developments since the publication of the first edition in 2013 The first is the growing awareness of the climate crisis as an existential threat and associated concern about adaptive strategies for sustainable water management and ways of using water management for climate mitigation e g practically through agricultural soil management and conceptually through ethics awareness Second there has been increased clarity among the religious community Indigenous leaders and progressive academics that ethics needs to become an arena for application and action e g the Vatican encyclical Laudato Si protests at Standing Rock and Flint Michigan in the US and climate demonstrations worldwide Thirdly there have been new normative water standards ranging from water stewardship industry initiative water charters Berlin and the on going initiative to develop a global water ethics charter Drawing on case studies from countries including Australia India the Philippines South Africa and the United States this textbook is essential reading for students of environmental ethics and water governance and management

The Articulate Surface Ben Pell, 2012-11-05 Ornament is currently acquiring a renewed status in architecture As contemporary technologies of design and fabrication introduce unprecedented opportunities to intertwine the constructive logics and expressive articulations of buildings ornament has re emerged as a means to explore the interactions between function and decoration volume and surface structure and envelope This book gives a systematic account of the technologies employed in the production of ornament and the strategies of its application today examining a range of international built examples Architects with

Urban Heat Mitigation

Strategies Paola Favaro, Konstantina Vasilakopoulou, 2025-06-30 Urban Heat Mitigation Strategies An Architecture Perspective explores heat mitigation strategies integrated into the urban architecture of global cities aiming to enhance citizens quality of life through thoughtful design decisions blending architecture science and engineering The projects examined exemplify top tier approaches in architecture urban planning landscape design and engineering across diverse city precincts worldwide Inspired by architect and urban designer Lewis Mumford s 1970s call for urban spaces that support citizens these initiatives focus not just on aesthetics but also on effective social and climate change mitigation strategies Featuring international urban projects recognised for both architectural significance and improved thermal comfort this book examines the various heat mitigation strategies in major urban projects using architectural and engineering methodologies Combining architectural formal critical analysis with engineering performance modelling the authors offer qualitative and quantitative assessments of each urban project These projects showcase best practices utilising elements such as water materials vegetation and canopy to mitigate heat and promote civic life Originally intended for aesthetics and social functionality these strategies now serve as benchmarks for creating thermally comfortable public spaces globally Relevant to architects city planners landscape designers and engineers Urban Heat Mitigation Strategies An Architecture Perspective promotes successful collaboration among built environment professionals to address climate concerns and create liveable comfortable urban spaces

What Has Nature Ever Done For Us? Tony Juniper, 2013-01-10 From Indian vultures to Chinese bees Nature provides the natural services that keep the economy going From the recycling miracles in the soil an army of predators ridding us of unwanted pests an abundance of life creating a genetic codebook that underpins our food pharmaceutical industries and much more it has been estimated that these and other services are each year worth about double global GDP Yet we take most of Nature s services for granted imagining them free and limitless until they suddenly switch off This is a book full of immediate impactful stories containing both warnings such as in the tale of India s vultures killed off by drugs given to cattle leading to an epidemic of rabies but also the positive how birds protect fruit harvests coral reefs protect coasts from storms and how the rainforests absorb billions of tonnes of carbon released from cars and power stations Tony Juniper s book will change whole way you think about life the planet and the economy

Building with

Water Zoë Ryan, 2012-11-05 Water has been an important topic in architecture and urban planning for years. The revitalization of the waterfront has been a prevalent trend in cities around the world. On the other hand, architecture also had to respond to the threat of floods. The theme of *Building with Water* is the use of water in architecture. It presents buildings that explicitly refer to water in their design and form. It establishes a typology of building by the water: residential structures, recreation facilities, industry, and infrastructure buildings for culture and art. The various design parameters are explored in four essays. Subsequently, twenty-two international projects are presented, organized according to their locations: by a river, a lake, or the sea. The authors' concern is not to show luxurious buildings in privileged locations but rather presenting projects that seriously grapple with the main criterion of the location: namely, water, in an ecologically sustainable way and respond to it with their design. *Wasser ist seit Jahren ein wichtiges Thema in Architektur und Städtebau. Building with Water thematisiert die Verarbeitung von Wasser im architektonischen Entwurf; es werden Bauten vorgestellt, die sich in ihrer Gestaltung und Form ausdrücklich auf Wasser beziehen. Eine Typologie des Bauens am Wasser wird erstellt: Wohnbauten, Verkehrs- und Industriebauten, Bauten für Kultur und Freizeit. Ebenso werden einleitend klassische Beispiele des Bauens am Wasser auf dem Wasser gezeigt, wie etwa Chateau de Chenonceaux an der Loire, Falling Water in Pennsylvania von Frank Lloyd Wright oder das Salk Institute in La Jolla, Kalifornien von Louis I. Kahn. Geordnet nach ihren Standorten am Fluss, See oder Meer werden dann etwa 20 internationale Projekte vorgestellt. Es geht den Autoren nicht darum, luxuriöse Bauten an privilegierten Plätzen zu zeigen, sondern Projekte darzustellen, deren Entwurf sich ernsthaft und ökologisch verträglich mit dem Hauptkriterium des Standortes nämlich Wasser auseinandersetzt und sich gestalterisch darauf bezieht.* *The Rise of the Naked Economy* Ryan Coonerty, Jeremy Neuner, 2013-07-09 What happens when work is no longer a place but a state of mind when the trappings that have defined the economy as we knew it are stripped away and we start from the bare essence of what it means to make a living? From corner coffee shops to Fortune 500 companies, workers from all different backgrounds are creating a new reality and prosperity. *The Rise of the Naked Economy* shows readers how to achieve both personal and professional success in an economy that does not guarantee lifetime employment. Pioneers Coonerty and Neuner report from the front lines on the future of work. From the recently graduated to the recently laid off, this book covers how the rise in non-traditional employment calls for a new infrastructure strategy and attitude for workers, companies, and communities alike. Through interviews with the people, companies, and policymakers who are leading the change and already profiting from it, *The Rise of the Naked Economy* provides an optimistic, humorous, and inspirational vision for readers who want to reclaim their lives and livelihoods. [Addressing Climate Risk in Coastal Urban Areas of East and Southeast Asia](#) Bruce Chong, 2025-11-04 *Addressing Climate Risk in Coastal Urban Areas of East and Southeast Asia* provides an in-depth exploration of the multifaceted challenges posed by climate hazards in coastal urban areas of East and Southeast Asia.
