Designing For The Digital Age How To Create Human Centered Products And Services Kim Goodwin:

Designing for the Digital Age Kim Goodwin, 2011-03-25 Whether you're designing consumer electronics, medical devices, enterprise Web apps, or new ways to check out at the supermarket, today's digitally enabled products and services provide both great opportunities to deliver compelling user experiences and great risks of driving your customers crazy with complicated, confusing technology. Designing successful products and services in the digital age requires a multi-disciplinary team with expertise in interaction design, visual design, industrial design, and other disciplines. It also takes the ability to come up with the big ideas that make a desirable product or service, as well as the skill and perseverance to execute on the thousand small ideas that get your design into the hands of users. It requires expertise in project management, user research, and consensus building. This comprehensive, full-color volume addresses all of these and more, with detailed how-to information, real-life examples, and exercises. Topics include assembling a design team, planning and conducting user research, analyzing your data, and turning it into personas; using scenarios to drive requirements definition and design; collaborating in design meetings; evaluating and iterating your design; and documenting finished design in a way that works for engineers and stakeholders alike.

Accompany's 9780470229101 *Designing for Interaction* Dan Saffer, 2010 Building products and services that people interact with is the big challenge of the 21st century. Dan Saffer has done an amazing job synthesizing the chaos into an understandable, ordered reference that is a bookshelf must-have for anyone thinking of creating new designs. Jared Spool, CEO of User Interface Engineering Interaction design is all around us. If you've ever wondered why your mobile phone looks pretty but doesn't work well, you've confronted bad interaction design. But if you've ever marveled at the joy of using an iPhone, shared your photos on Flickr, used an ATM machine, recorded a television show on TiVo, or ordered a movie off Netflix, you've encountered good interaction design: products that work as well as they look. Interaction design is the new field that defines how our interactive products behave. Between the technology that powers our devices and the visual and industrial design that creates the products' aesthetics lies the practice that figures out how to make our products useful, usable, and desirable. This thought-provoking new edition of *Designing for Interaction* offers the perspective of one of the most respected experts in the field, Dan Saffer. This book will help you learn to create a design strategy that differentiates your product from the competition; use design research to uncover people's behaviors, motivations, and goals in order to design for them; employ brainstorming best practices to create innovative new products and solutions; understand the process and methods used to define product behavior; and also offers interviews and case studies from industry leaders on prototyping, designing in an Agile environment, service design, ubicomp.
