Representing Landscapes: Digital Nadia Amoroso, 2015-02-27 Most landscape architectural designs now include some form of digital representation but there is much more scope for creativity beyond the standard Photoshop montages In this new book on representing landscapes Nadia Amoroso brings together contributions from some of the leading landscape departments in the world to explore the variety in digital illustration methods In each chapter leading lecturers professors and practitioners in the field of landscape architecture explain a specific digital approach with the use of images from their department to show how each technique can be used in inspirational examples Throughout the book over 200 colour images cover the spectrum of digital representation to help discuss the various drawing types which are invaluable when communicating ideas in the field of landscape architecture With worked examples in the chapters and downloadable images suitable for class use this is an essential book for visual communication and design studios

The Autopoiesis of Architecture, Volume I Patrik Schumacher, 2011-04-20 Take a theoretical approach to architecture with The Autopoiesis of Architecture which presents the topic as a discipline with its own unique logic Architecture's conception of itself is addressed as well as its development within wider contemporary society Author Patrik Schumacher offers innovative treatment that enriches architectural theory with a coordinated arsenal of concepts facilitating both detailed analysis and insightful comparisons with other domains such as art science and politics He explores how the various modes of communication comprising architecture depend upon each other combine and form a unique subsystem of society that co evolves with other important autopoietic subsystems like art science politics and the economy The first of two volumes that together present a comprehensive account of architecture's autopoiesis this book elaborates the theory of architecture's autopoiesis in 8 parts 50 sections and 200 chapters Each of the 50 sections poses a thesis drawing a central message from the insights articulated within the respective section The 200 chapters are gathering and sorting the accumulated intelligence of the discipline according to the new conceptual framework adopted in order to catalyze and elaborate the new formulations and insights that are then encapsulated in the theses However while the theoretical work in the text of the chapters relies on the rigorous build up of a new theoretical language the theses are

written in ordinary language with the theoretical concepts placed in brackets The full list of the 50 theses affords a convenient summary printed as appendix at the end of the book The second volume completes the analysis of the discourse and further proposes a new agenda for contemporary architecture in response to the challenges and opportunities that confront architectural design within the context of current societal and technological developments *The Digital Turn in Architecture 1992 - 2012* Mario Carpo, 2013-06-27 Architektur im digitalen Zeitalter eine zwei Jahrzehnte alte und wechselvolle Geschichte Dieses Buch aus der Reihe Architectural Design AD beschreibt s mtliche Stufen und Phasen von Folding zu Cyberspace Nichtlinearit t und Hypersurface Architektur von Versionierung zu Skripting Emergenz Informationsmodellen und Parametricism Es erfasst und interpretiert den Geist der jeweiligen Zeit mit dokumentarischer Pr zision f rdert und antizipiert oftmals bedeutende Entwicklungen in Architektur und Architekturtheorie Diese Anthologie der bedeutendsten Artikel aus Architectural Design ist chronologisch und thematisch geordnet bietet einen vollst ndigen historischen Zeitstrahl zu computergest tztem Design und digitalen Produktionsformen von den Anf ngen bis zur heutigen Vorrangstellung dieser Technologien Mario Carpo gibt in seiner ausf hrlichen Einleitung und im Vorwort zu jedem Originaltext einen scharfsinnigen berblick ber die j ngste Geschichte des digitalen Designs Diese Synopse fehlte bislang sowohl als p dagogisches Instrument f r Studenten als auch Forschungsinstrument f r Wissenschaftler Sie spannt den Bogen zwischen dem Status quo digitaler Architektur und der Geschichte und Theorie j ngster Entwicklungen und Trends stellt wichtige Fragen zu den heutigen Methoden und Techniken im professionellen Design Eine umfassende Anthologie digitaler Architektur von Mario Carpo einem der herausragendsten Wissenschaftler in diesem Fachgebiet enth lt bahnbrechende Essays von Bernard Cache Peter Eisenman John Frazer Charles Jencks Greg Lynn Achim Menges und Patrik Schumacher stellt die wichtigsten Werke von FOA Frank Gehry Zaha Hadid Ali Rahim Lars Spuybroek NOX Kas Oosterhuis und ShoP vor

Deleuze and Architecture Helene Frichot, 2013-05-31 This collection looks critically at how Deleuze challenges architecture as a discipline how architecture contributes to philosophy and how we can come to understand the complex politics of space of our increasingly networked world *Representing Landscapes* Nadia Amoroso, 2019-01-15 The fourth book in Nadia Amoroso s Representing Landscapes series this text focuses on traditional methods of visual representation in landscape architectural education Building on from the previous titles in the series which look at digital and hybrid techniques Representing Landscapes Analogue is a return to the basic foundations of landscape architecture s original medium of visual communication Each of the 20 chapters includes contributions from leading professors teaching studio and visual communication courses from landscape architecture programs across the globe showcasing the best student examples of analog techniques It demonstrates the process from graphics as a form of research design development and analysis to the final presentation through drawings models and descriptive captions of the methods styles and techniques used It features critical and descriptive essays from expert professors and lecturers in the field who emphasise the importance of the

traditional medium as an intrinsic part of the research design and presentation process Over 220 full colour images explore the range of visual approaches students and practitioners of landscape architecture can implement in their designs With worked examples in the chapters and downloadable images suitable for class use this is an essential book for visual communication and design studios

Strategies for Landscape Representation Paul Cureton,2016-12-08 Strategies for Landscape Representation discusses a variety of digital and analogue production techniques for the representation of landscape at multiple scales Careful consideration is required to represent time and to ensure accuracy of representation and evaluation in the landscape Written as a guide for making appropriate selection of a wide variety of visualisation tools for students and built environment professionals with an interest in landscape the book charts emerging technologies and historical contexts whilst also being relevant to landscape legislation such as Building Information Modelling BIM and Landscape Assessment This book is an innovation driven text that encourages readers to make connections between software technology and analogue modes The management choice and combination of such modes can arguably narrow the unknown of landscape character address the issues of representing time

and change in landscape and engage and represent communities perceptions and experience of landscape Showcasing international examples from landscape architecture planning urban design and architecture artists visualisers geographers scientists and model makers the vitality of making and intrinsic value of representational work in these processes and sites is evidenced An accompanying companion website provides access to original source files and tutorials totalling over a hundred hours in mapping and GIS diagrams and notation photomontage 3D modelling and 3D printing Cartographic Grounds Charles Waldheim, Jil Desimini, 2016-06-28 Mapping has been one of the most fertile areas of exploration for architecture and landscape in the past few decades While documenting this shift in representation from the material and physical description toward the depiction of the unseen and often immaterial Cartographic Grounds takes a critical view toward the current use of data mapping and visualization and calls for a return to traditional cartographic techniques to reimagine the manifestation and manipulation of the ground itself Each of the ten chapters focuses on a single cartographic technique sounding spot elevation isobath contour hachure hatch shaded relief land classification figure ground stratigraphic column cross section line symbol conventional sign and illustrates it through beautiful maps and plans from notable designers and cartographers throughout history from Leonardo da Vinci to James Corner Field Operations Mohsen Mostafavi dean of the Harvard Graduate School of Design introduces the book **Digital Processes** Moritz Hauschild, Rüdiger Karzel, 2012-12-10 these days a computer is as much a part of every household's standard equipment as a refrigerator and yet the explosion of computer technology in the last several decades has transformed the daily life of every member of society far more than even utopians would ever have allowed themselves to dream No wonder then that from design to production architecture too is becoming more and more subject to digital influences The range of those influences stretches from the classical computer programs used in design and presentation to media supported design processes all the way to computerized production techniques to say nothing of industrialized bricklayer robots From measurement to planning and production architecture is the product of a closely coordinated digital process chain What influence do digital design digital design and production methods have on contemporary architecture How are these methods changing architecture and the way it is created Where does the potential of digital media for architecture lie What are the areas in which every individual firm can begin to use them What are the advantages of working electronically How and at what cost can these methods be integrated into the day to day work of the professional architect This publication offers answers to these and many other questions on all aspects of the digital design and construction process **Architectural and Urban Reflections after Deleuze and Guattari** Constantin V. Boundas, Vana Tentokali, 2017-12-15 The post humanist movement which currently traverses various disciplines in the arts and humanities as well as the role that the thought of Deleuze and Guattari has had in the course of this movement has given rise to new practices in architecture and urban theory This interdisciplinary volume brings together architects urban designers and planners and asks them to reflect and report on the built place and the city to come in the

wake of Deleuze and Guattari The Complexities of John Hejduk's Work J. Kevin Story, 2020-06-09 This book traces the development of John Hejduk's architectural career using the idea of exorcism to uncover his thought process when examining architectural designs His work encouraged profound questioning on what why and how we build which allowed for more open discourse and enhance the phenomenology found in architectural experiences Three distinct eras in his architectural career are applied to analogies of outlines apparitions and angels throughout the book across seven chapters Using these thematic examples the author investigates the progression of thought and depth inside the architect's imagination by studying key projects such as the Texas houses Wall House Architectural Masques and his final works Featuring comments by Gloria Fiorentino Hejduk Stanley Tigerman Steven Holl Zaha Hadid Charles Jencks Phyllis Lambert Juhani Pallasmaa Toshiko Mori and others this book brings to life the intricacies in the mind of John Hejduk and would be beneficial for those interested in architecture and design in the 20th century *Apartment Block Design* Simos Vamvakidis, 2025-12-08 This architectural design book focuses on massing studies for multi unit housing projects namely apartment blocks it provides a fresh look at architectural synthesis for architects students and architecture curious readers The author re-examines the apartment block as a design model for today and tomorrow through a simple flexible and explicit design approach The innovation of this book lies in the idea that any type of apartment block can be designed and understood using three programmatic areas elements of any apartment building housing units circulation and communal spaces The book's author clearly and explicitly demonstrates multiple combinations of the three elements during the massing phase of schematic design for multi unit housing projects by examining case studies of twelve globally renowned apartment buildings This approach offers multiple design solutions rather than a single proposal All case studies are examined using diagrams drawings and photographs and a conclusion at the end of each chapter outlines the main knowledge acquired Beautifully designed and illustrated with over 150 full colour illustrations this book is essential reading for any architect student or reader interested in apartment block design Plasma Works From Topological Geometries to Urban Landscaping Maria Elisabetta Bonafede, 2014-12-02 Volume 33 of The IT Revolution in Architecture this book outlines the work of Plasma studio from the cultural elements tied to landform to the parametric development of the projects to the very organization of the studio The topological geometries of the interior of the Hotel Puerta America the advanced conceptualization of landform architecture the approach to the complex design synthesis of landscape urbanism at the great Flowing Gardens in Xi'an are a demonstration of how digital experimentation is a crucial weapon today The author explores the intersections between digital philosophy emerging technologies and architecture and offers the reader the first complete critical and theoretical analysis of the work of Plasma studio Founder and editor of the book series before with Birkhauser and Testo Immagine and now with EdilStampa is Antonino Saggio www.arc1.uniroma1.it Saggio IT **Ground Rules in Humanitarian Design** Alice Min Soo Chun, Irene E. While still in college, students are being given the opportunity to directly participate in programmes that provide vital facilities for communities abroad. While these international initiatives remain largely ad hoc, this book provides parameters for engagement and establishes best practices for approaching these projects with a global perspective. With expert insight and practical strategies on the ground, *Ground Rules in Humanitarian Design* is an essential resource for architects at any level. *Advances in Civil, Architectural, Structural and Constructional Engineering* Dong-Keon Kim, Jongwon Jung, Junwon Seo, 2016-04-05. The ICCASCE 2015 conference covers a wide range of fields in science and engineering innovation and aims to bring together engineering technology expertise. Scientists, scholars, engineers, and students from universities, research institutes, and industries all around the world gathered to present on going research activities. This proceedings volume *Design in the Borderlands* Eleni Kalantidou, Tony Fry, 2014-05-09. This book makes a significant contribution to advancing post geographic understandings of physical and virtual boundaries. It brings together the emergent theory of border thinking with innovative thinking on design and explores the recent discourse on decoloniality and globalism. From a variety of viewpoints, the topics engaged show how design was historically embedded in the structures of colonial imposition and how it is implicated in more contemporary settings in the extension of epistemological colonialism. The essays draw on perspectives from diverse geo cultural and theoretical positions including architecture, design theory, and history, sociology, critical theory, and cultural studies. The authors are leading and emergent figures in their fields of study and practice, and the geographic scope of the chapters ranges across Europe, the Middle East, Africa, South America, Asia, and the Pacific. In recognition of the complexity of challenges that are now determining the future security of humanity, *Design in the Borderlands* aims to contribute to thinking futures by adding to the increasingly significant debate between design in the context of the history of Western modernity and decolonial thought.
